Your terminal must vyglèdet like this:

Рассмотрим ставку на понижение цены

Look at the screenshot below

So, Control and communication indicator we **GP Star_v2**. He gives out signals in the form of color asterisks on candles. White asterisks - up signal, and yellow asterisks - down signal. This indicator is equipped with the alert. The remaining indicators serve to filter its signals. A feature of the indicator is that it puts an asterisk in the previous candle, and we are working on a signal on the current candle.

Look at the picture above. Current appeared red candle (at it indicates blue arrow 1). At this load the alert on the previous spark originated yellow asterisk (at it indicates blue arrow 2) - a signal down. Now we need the

signal filter.

First of all pay attention to the indicator **STOCH_Bars_M #_v2** in the upper right corner of the chart. It shows the situation immediately stochastics to 6 timeframes.

We are interested in only 2 of his arrows, from left to right on the timeframes M5 and M15 (they indicate blue arrows 3 and 4). When the signal down they should be red. A red rectangles on these timeframes (double blue arrow 6) should be higher than the lowest level (it indicates blue arrow 5).

Now look in the "basement". Indicator **GP_MACD 2** We drew a red bar (on He points to the blue arrow 7) - and need.

Now, again, in the basement, watch the color of the dotted line of the current indicator **GPTrend** (For it indicates blue arrow 8). This dotted line is we have the red color - and need.

Now, again in the basement looking indicator **Golden Varitey** . Its icons in a column, from bottom to top pieces 3 must be red (blue arrow 9).

Now we look at the graph indicator **# 4X 2011 XARD GOLDBANDS 2B** (Pointed to by the blue arrow 10). His tail at signal down (or the tip of the tail) must be red - as we have on the schedule.

Now pay attention to the moving average **Moving Average** with a period 70 (on it indicates blue arrow 11). This indicator shows us the current direction of the trend. When the signals down to the tail of this indicator is to look down (can be a very slight slope), as we have on the schedule. It is possible and to the side, is not important up.

So all usloviè soblyadeny and we buy a call option on the drop in prices for a period expiration of 30 minutes.

So, Control and communication indicator we **GP Star_v2**. He gives out signals in the form of color asterisks on candles. White asterisks - up signal, and yellow asterisks - down signal. This indicator is equipped with the alert. The remaining indicators serve to filter its signals. A feature of the indicator is that it puts an asterisk in the previous candle, and we are working on a signal on the current candle.

Look at the picture above. Current appeared green candle (at it indicates blue arrow 1). At this load the alert on the previous spark originated white asterisk (at it indicates blue arrow 2) - up signal. Now we need the signal filter.

First of all pay attention to the indicator **STOCH_Bars_M #_v2** in the upper right corner of the chart. It shows the situation immediately stochastics to 6 timeframes. We are interested in only 2 of his arrows, from left to right on the timeframes M5 and M15 (they indicate blue arrows 3 and 4). When the signal up, they must be green. A green rectangles on these timeframes (double blue arrow 6) must be below the upper level (it indicates blue arrow 5).

Now look in the "basement". Indicator **GP_MACD 2** We painted green bar (to
He points to the blue arrow 7) - and need.

Now, again, in the basement, watch the color of the dotted line of the current indicator
GPTrend (For it indicates blue arrow 8). This dotted line is we have green
color - and need.

Now, again in the basement looking indicator **Golden Varitey** . Its icons in a column, from bottom to top
3 pieces should be green (blue arrow 9).

Now we look at the graph indicator **# 4X 2011 XARD GOLDBANDS 2B** (Pointed to by the blue arrow
10). His tail at signal up (or tail tip) must
be green - as we have on the schedule.

Now pay attention to the moving average **Moving Average** with a period 70 (on it indicates blue arrow 11).
This indicator shows us the current direction of the trend. When signals up the tail of this indicator is to
look up (can be a very slight slope), and can be sideways, as we have on the schedule.

The main thing is not down.

**So all usloviè soblyadeny and we buy an option to increase the price for a period
expiration of 30 minutes.**

To signal was greater use immediately valyatnyh many couples.
