ALL FOREX PAIRS & ALL TIME FRAMES

Installation and Setup. MetaTrader 4 Client Terminal

“You should save your Indicator in the specific folder location, which is: “MT4 > File > OpenDataFolder > MQL4 > **Experts**”

LET ME HELP YOU TO FIND THIS NEW FOLDER:

Start MetaTrader4. Select File in the menu, **Open Data Folder**.

You will be in a special MT4 folder: its name may vary depending on your broker. But that's the folders you will see:

Open MQL4 folder – check the picture in the middle. Here you will find **Experts** folder: Copy and paste panel inside **Experts** folder.

Now RESTART MetaTrader4.
The files will appear under Navigator list.

The Navigator panel displays all the accounts, indicators, expert advisors and scripts available to you. If you followed the simple instruction above, you should see Elite-Panel in Experts.

If you don't see it there, please make sure you have placed the file in the correct folder, as described above. Relaunch MetaTrader 4 and check it once again.

If it is still not listed there, contact our technical support by sending an email to: denmurakami@gmail.com

VIDEO GUIDE: <https://www.youtube.com/watch?v=ScSj-RLp6Mw>

Open ANY chart and drag panel there.

A window with the settings appears. Open Common settings and enable Live Trading and DLL imports. It is required for Auto Trade option. Please, make all the settings in the "Common" tab the same as below.

Important note: you can hide each panel in one click. EASY. This help you to have all options at one panel, but still save your chart's space.

Save your chart from useless information. EASY!!!

Let's focus on each panel.

PART 1. Smart options:

1. Pair: you can add any other pair on current chart. The list of pairs come from Market Watch MT4. If you want to compare pairs on same chart - this is the best way... want to find correlation between pairs - easy.

2. Time Frame: as soon as you add extra pair on current chart, you are able to chose TF of that pair too. Also, you can add same pair and chose higher TF. Then you will be able to see visually upcoming trend right on the chart. EASY.

3. Classic: you can add 3 classic indicators on the chart: Stochastic (STH), RSI, EMA. They have common settings and show up(blue)/down(red) or grey (middle). You can see trend direction by classic tools on M15 to H4 time frames. This will help you in

decisions too. Also, by personal request we will issue a version where you will be able to set own settings for each classic indicator.

4. Scripts buttons: by using these 3 buttons you will be able to close orders on current pair by one click. You can close all or profit/loss orders. Easy.

PART 2. Trading options:

1. Buy/Sell: You may open Buy or Sell order by clicking this button. When you click it, a new instant order with a specific Magic Number is placed. This way E-Panel does not affect other manual orders that usually go with zero magic numbers.

2. Lot size, Take Profit, Stop Loss: Basic options for trading are placed within a single panel so you can control it at any time. You don't need to go to Inputs of the indicator as they are all here, at a chart. You set here Take Profit, Stop Loss values, Lot Size. In addition, you

may set here Breakeven and Trailing Stop Loss if needed.

- ✓ **Take Profit:** target profit in Pips for auto TRADE/ manual orders if support
- ✓ **StopLoss:** max possible loss in Pips for auto TRADE / manual orders if support
- ✓ **Lot:** lot size for auto trade option

Smart Stop Loss/Take Profit: if you chose SMART in TP and SL, it will use previous 25 bars for important levels and calculate SL/TP based on it. Anyway, There are some limits there... Take Profit won't be more than 100, less than 20. Stop Loss will be 80 Pips max, 30 Pips min. Always, TP will be higher than Stop Loss.

3. Options: you can add trailing Stop Loss and BreakEven for trading. Chose BE(BreakEven) or TrailSL(Trailing Stop Loss) or both BE/TSL.

- ✓ **BE:** value of profit in Pips when you want to move Stop Loss to +1 Pips
- ✓ **T-Start:** trailing SL start point, in Pips.

✓ **T-Level:** distance between trailing SL and price.

Easy to calculate: If you have T-Start 5 and T-Level 5, means that at +10 Pips profit, SL moves to +5 Pips(Start) and follow the price on +5 pips distance(T-Level). Each 1 Pips.

4. Magic: Elite-Panel means that indicator won't manage all manual orders. It will manage just AutoTrade orders and manual orders made from the panel. But it won't manage all manual orders. If you make it ALL - this indicator will manage all manual/AutoTrade orders.

**Feel free to ask me anything you need.
I will be glad to help you at any time.**

ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN. THE RISK OF LOSS IN TRADING FOREIGN EXCHANGE (FOREX) CAN BE SUBSTANTIAL. THE CUSTOMER SHOULD THEREFORE CAREFULLY CONSIDER WHETHER SUCH TRADING IS SUITABLE FOR HIM/HER IN LIGHT OF YOUR FINANCIAL CONDITION.
