

Intra day 50 bounce

ID-10 Rules

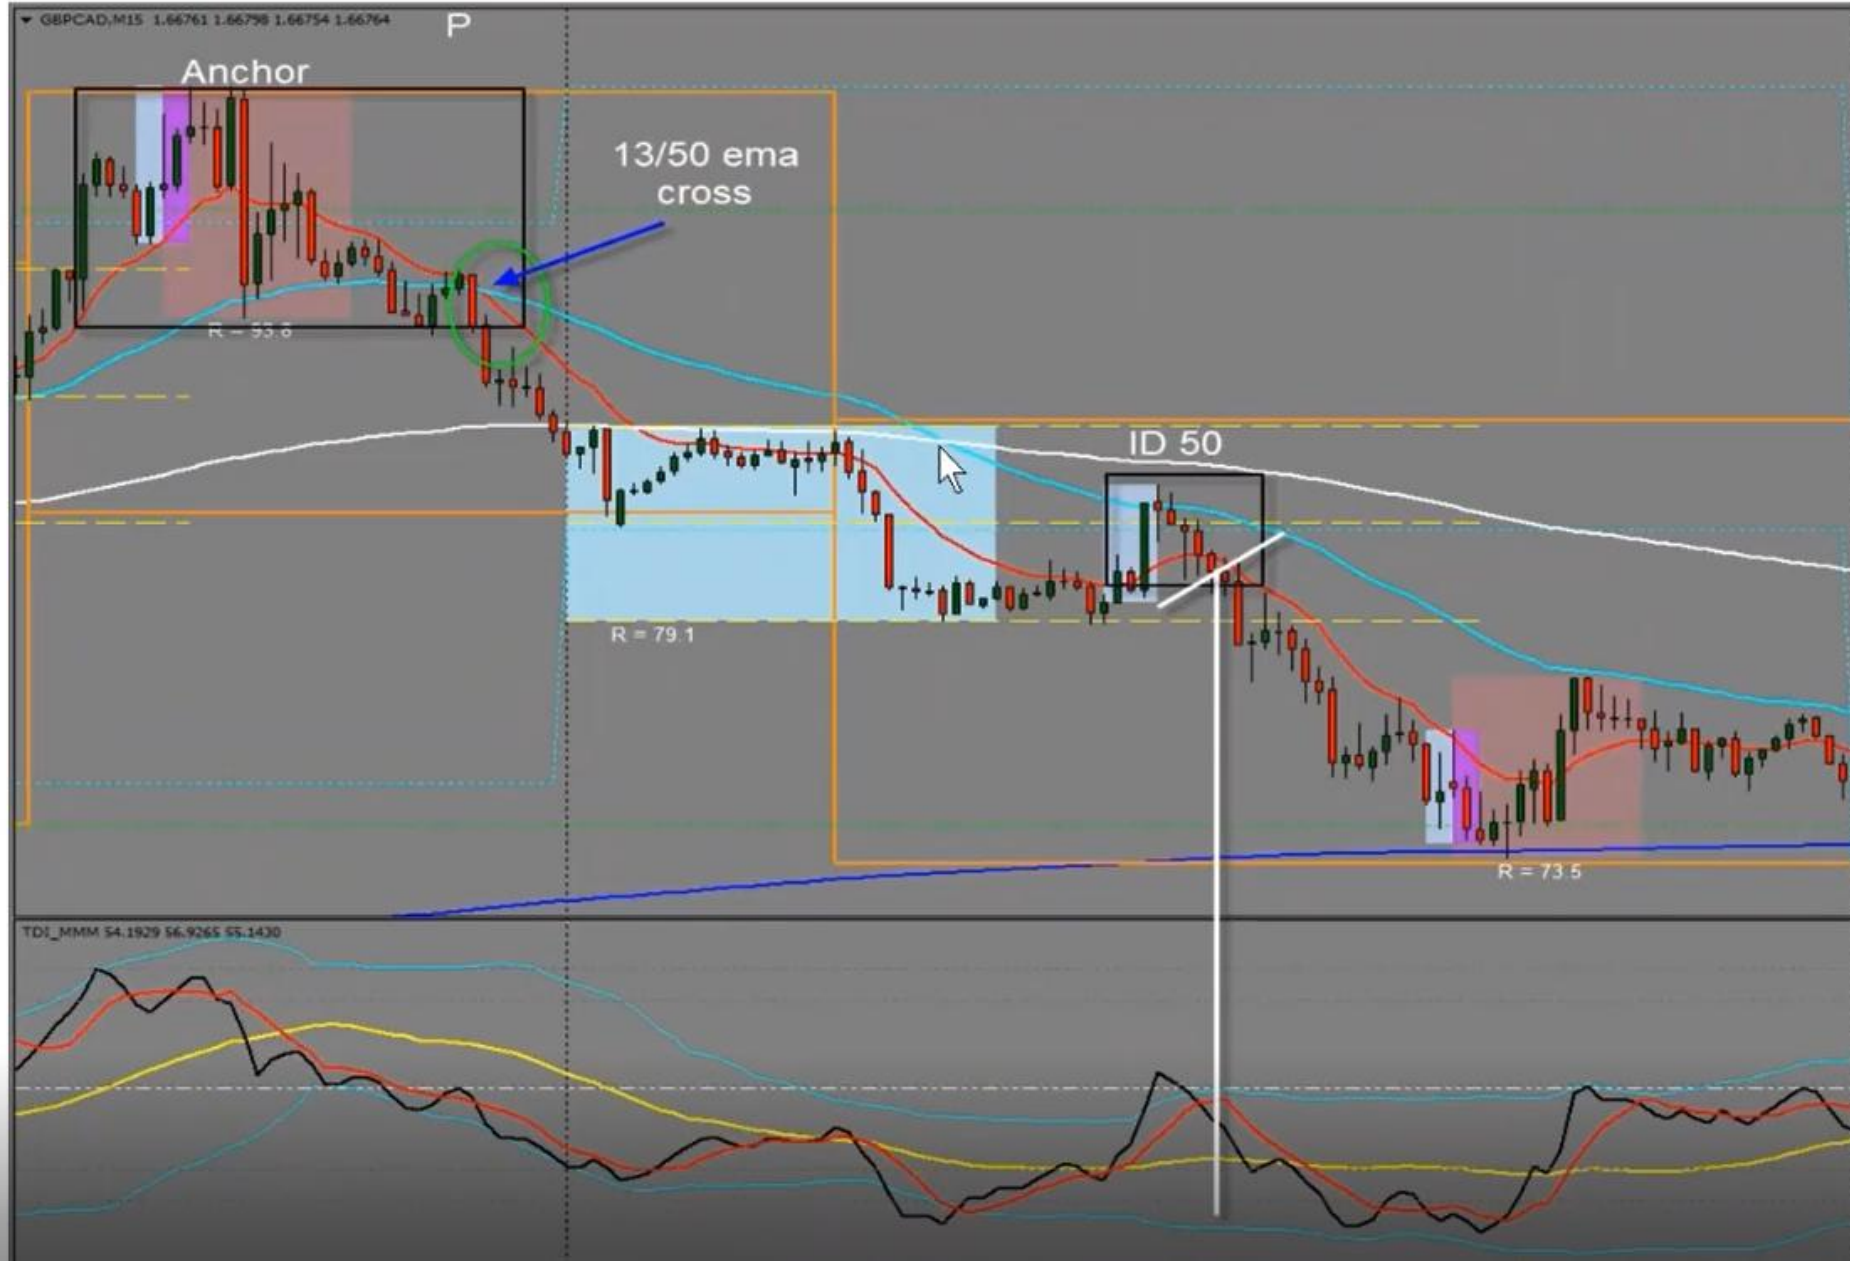

L3 – Anchor/Pattern to the left ...

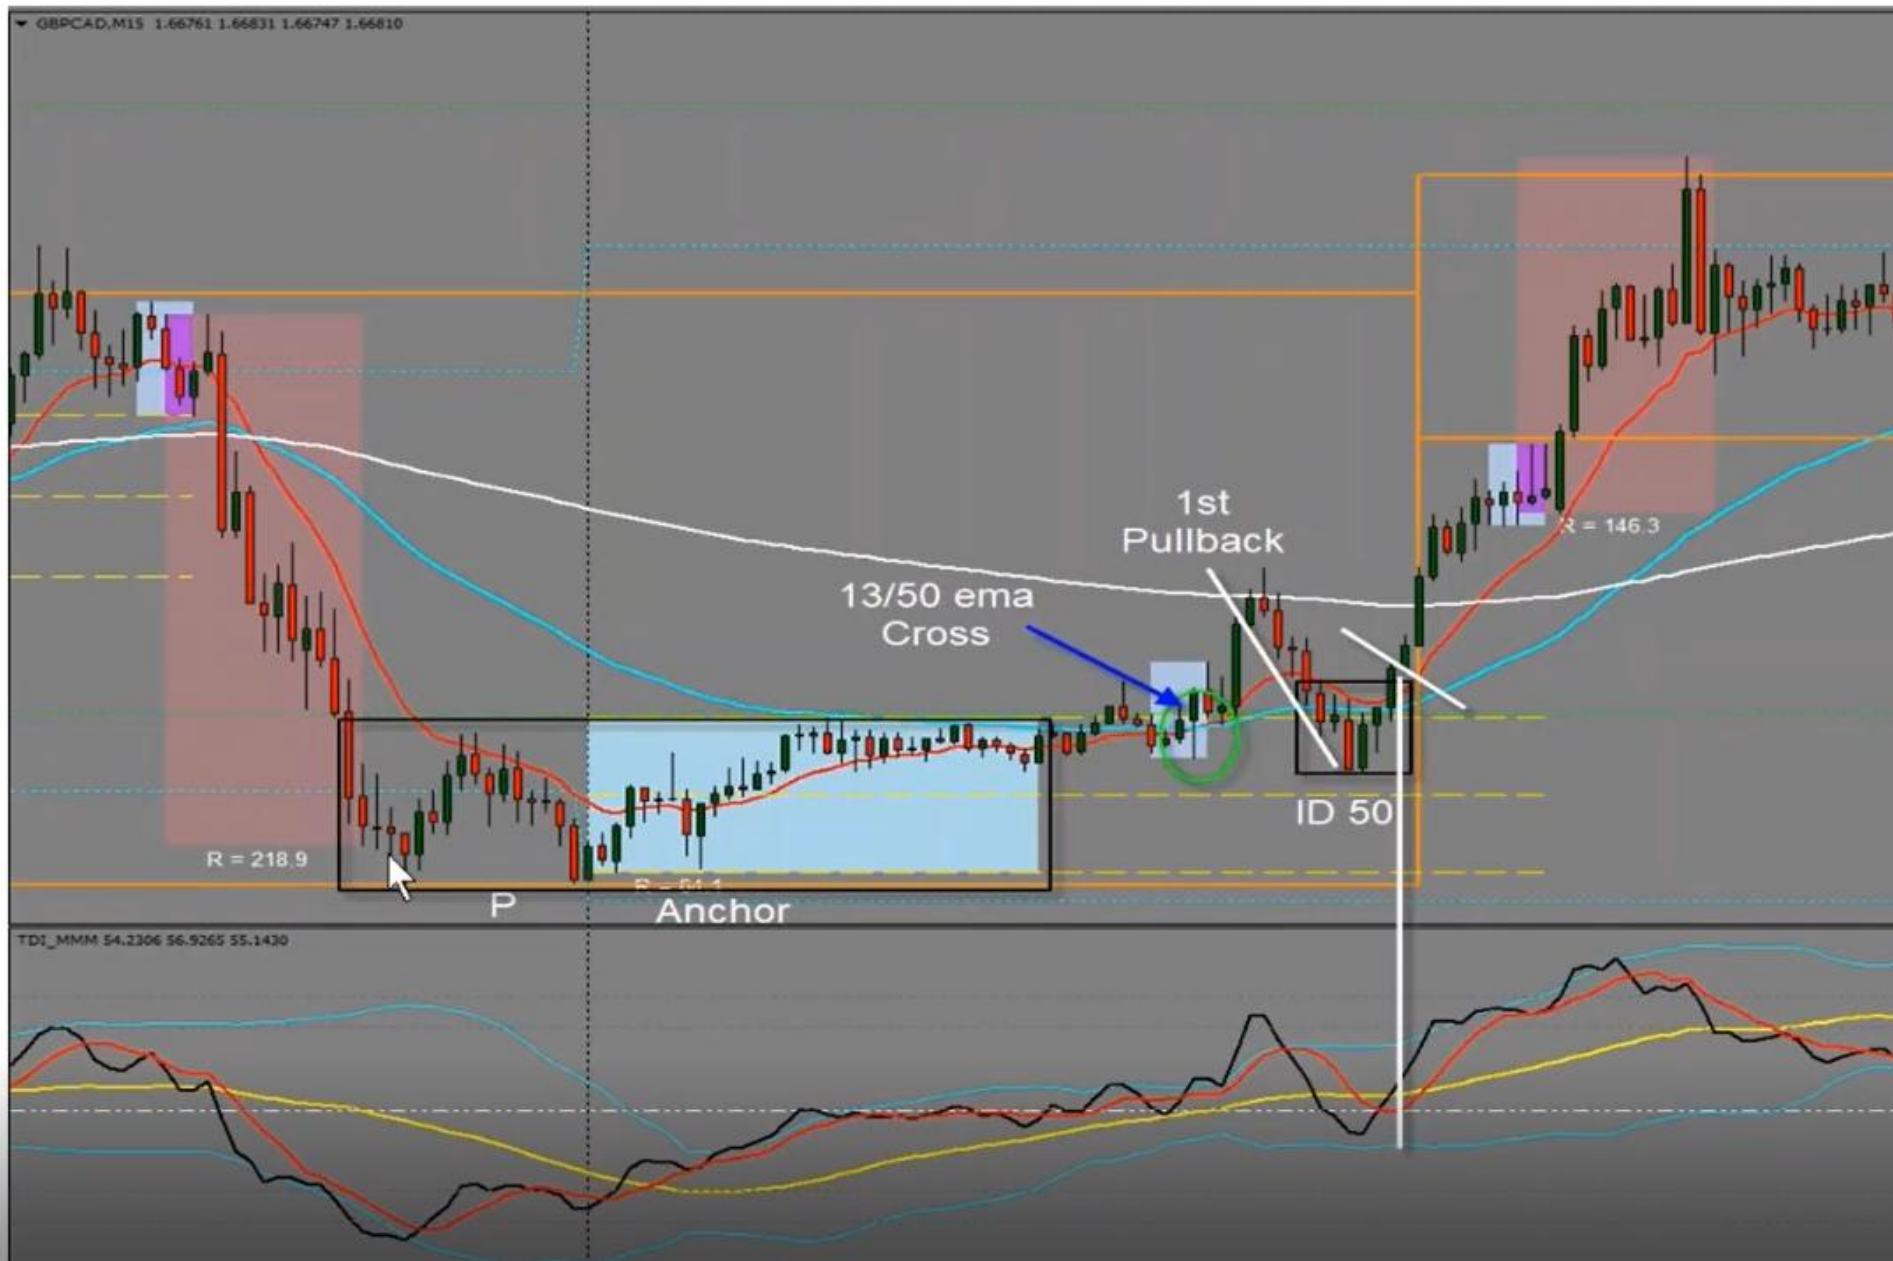

The 13/50ema have to cross.

If the 50/200ema crosses, its even nicer...

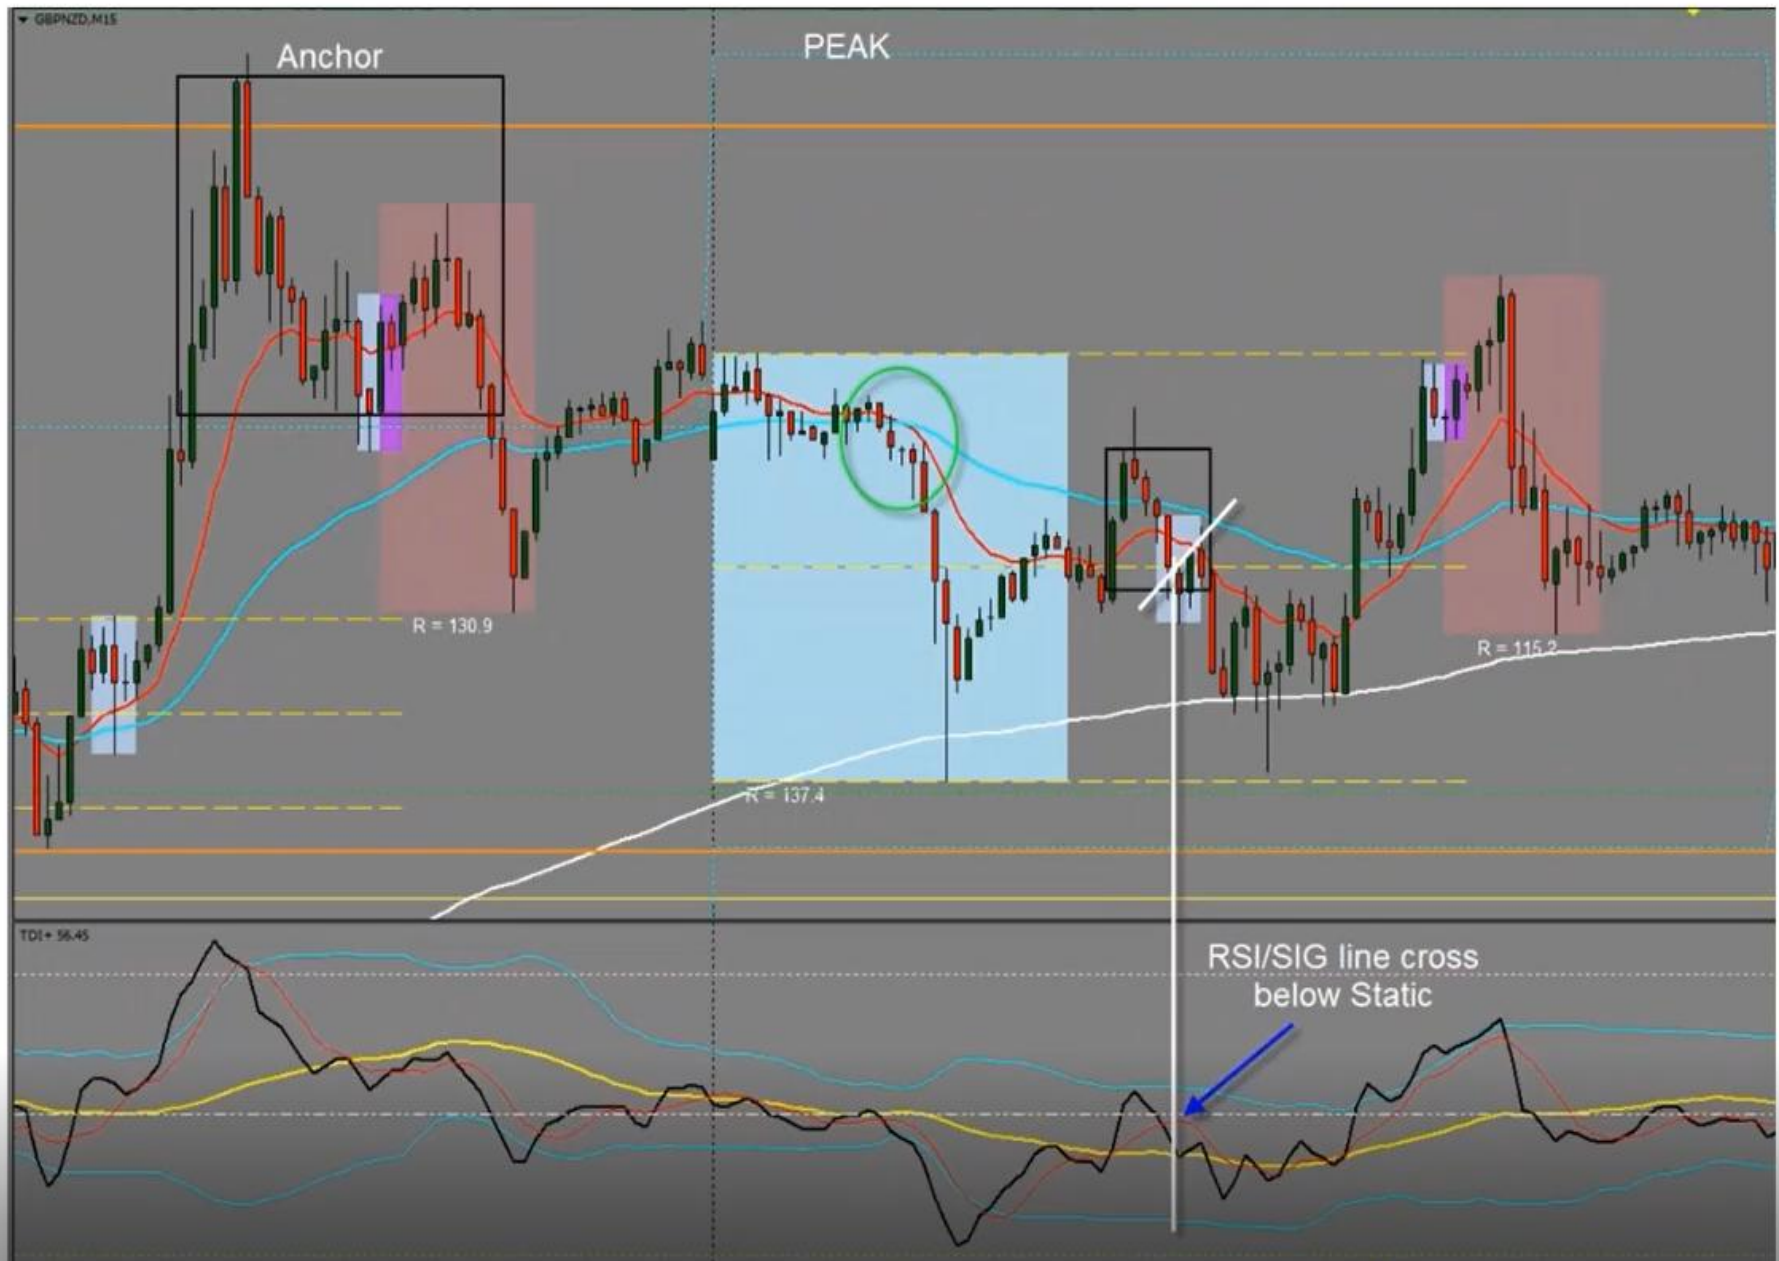

* 50/50 Bounce is the 1st Pullback after an Anchor.

Take the 1st pullback even if the Anchor is NOT CLEAN...

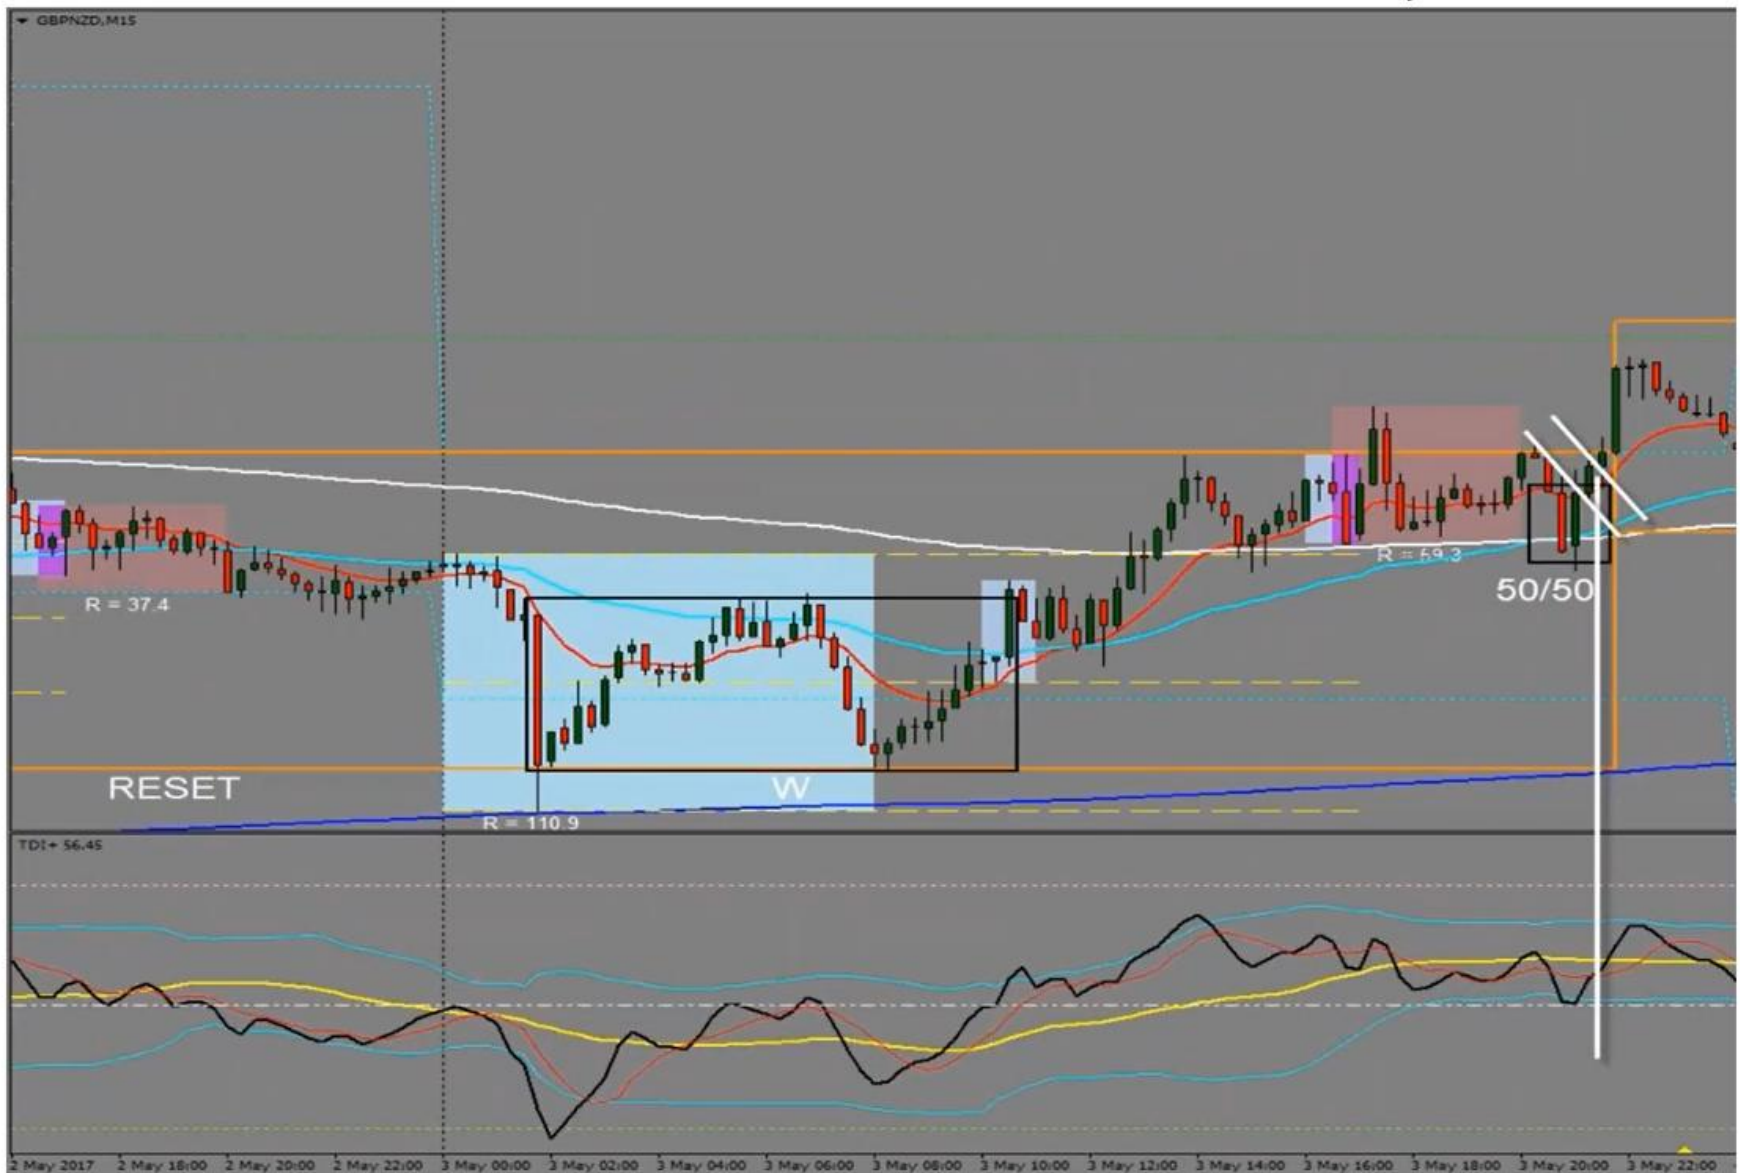

Use with TDI confirmation – RSI line cross Signal Line...

L3 – If the Anchor is Unclear, wait for the ID50...

RESETS – 13/50 cross and then the 1st pullback to 50ema...

RESETS – RSI/SIG line cross validates the TDI...

RESETS – the pullback can be quick...

What is an ID50 bounce trade...?

- It is the 1st pullback after an Anchor formation.
- It is a Trend Continuation setup.
- The 1st pullback occurs in all the time frame –
 - It's called the ID50 on the 15min charts.
 - It's called the 1hr 50/50 bounce on the 1hr charts.
 - It's called the 4hr 50/50 bounce on the 4hr charts.

ID50 Rules...

- Anchor present to the Left...
- The 13/50ema cross.
- The 1st pullback of price to the 50ema and has to be 25 to 50 pips. (Quick move back to the 50ema)
- Wait for Price to bounce or trap off the 50ema.
- Entry trigger – RR, STAR, COW or Shift candle close below the 13ema.
- TDI confirmation – RSI/Signal line cross.
