

# RAGHEE'S PROPULSION DOTS: EMAs DECODED!

BACK IN '08 I INTRODUCED "LAZY DAYS LINES" WHICH WAS RIBBON OF Exponential Moving Averages USED FOR "AUTOMATED" SUPPORT AND RESISTANCE.

5, 8, 13, 21, 34s, 55, 89, 144, 235, 610, ..1597 EMA

## PROPULSIONS DOT COLOR KEY (REPLACING EMAs WITH DOTS!)

DO NOT USE EMAs (EXCEPT THE 200) IN CHOPPY MARKETS.

EMAs ARE BEST TRUSTED IN GREEN OR RED GRaB CANDLE MARKETS AKA TRENDS!

FIBONACCI NUMBER BASED EMAs  
(VERY COMMON EMA SETTINGS)

MY PROPULSION DOT INDICATOR SETTINGS

EMA - SHORT EMA/LONG EMA - COLOR

8 EMA - 3/8 - RED

13 EMA - 8/13 - YELLOW (THIS IS AGGRESSIVE BUT POWERFUL)

21 EMA - 8/21 - GREEN\* THIS IS MY MOST IMPORTANT ONE!

55 EMA - 8/55 - CYAN

89 EMA - 8/89 - MAROON or MAGENTA

200 EMA - 8/200 - WHITE (THIS ONE IS VALID IN ANY MARKET TREND.)

WHAT'S NOT SO COMMON IS KNOWING WHEN NOT TO USE THEM OR "TURN THEM OFF" - AND THAT'S PROPULSION DOTS DO FOR YOU!

IF THEY "LIT UP" AND THERE'S A HIGH LIKELIHOOD OF A REACTION AT THAT EMA.

**THE "TREND FORMULA" IS THREE TO FIVE GRaB CANDLES OF THE SAME COLOR BEFORE STARTING THE DOT COUNT. THE DOT COUNT IS A MINIMUM OF FIVE...AFTER (!!!) THREE TO FIVE OF THE SAME COLOR GRaB CANDLES.**

YOU CAN USE A SHORTER FIBONACCI NUMBER INSTEAD OF "8" FOR THE SHORT EMA SETTING OF PROPULSION. OTHER ALTERNATIVES ARE 3 AND 5.

STAY AWESOME,
