

## Installation

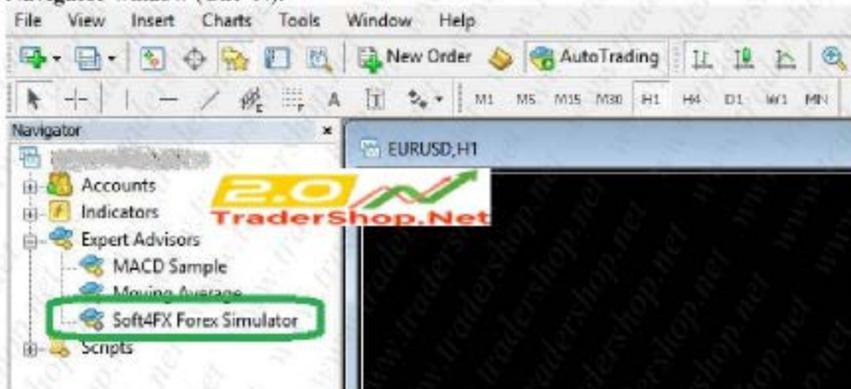

1. Make sure that **Microsoft .NET Framework 4.5** is installed on your system ([Check and install](https://www.microsoft.com/en-us/download/details.aspx?id=30653)). <https://www.microsoft.com/en-us/download/details.aspx?id=30653>
2. In your Metatrader 4 go to **File -> Open Data Folder** and locate **MQL4** folder.

3. Copy the downloaded **Soft4FX Forex Simulator.ex4** file into **MQL4\Experts**.
4. Restart Metatrader.
5. Make sure that **Allow DLL imports** is enabled in **Tools -> Options -> Expert Advisors** in Metatrader menu.

6. **Soft4FX Forex Simulator** should appear in the list of your **Expert Advisors** in the **Navigator** window (Ctrl+N).

## Startup and Activation

1. Open any new chart and drag **Soft4FX Forex Simulator** onto this chart.

Forex Simulator will clear the chart by removing all EAs, indicators and graphical objects, so it is always safer to use a new empty chart.

2. Configuration window will appear. Select **Inputs** tab.
3. Load the Activation.Set (Preset file)  
E-mail and code have to be entered every time when starting the simulator. However, you can use **Save** and **Load** buttons to store them and avoid typing errors.

Leaving the fields empty will make the simulator work in Demo mode.

Expert - Soft4FX Forex Simulator

4. Make sure your computer is connected to the Internet.
5. Click **OK**. Forex Simulator will start and verify your activation automatically. If there are any problems with activating or starting the simulator, it will be displayed on the chart.

6. Ready! You should now use **Data Center** to download historical tick data before starting a simulation.

For Update and Ex4.Unlock question..

Please contact email:

If we found out, we will banned your account and your IP without notice.  
You will not get any updates of any items you purchased.

7. If you are working on a laptop, plug it in. Laptop working on battery may sometimes offer lower performance to save energy. It is also advisable to use cable Internet connection instead of WiFi when downloading historical data. WiFi is usually much slower.
