

## This instruction is for Genius Binary Options indicator

- ❖ The Genius Binary Options indicator it predict the next candle if its Bull / Bear candle.
- ❖ Time frame from M5 and higher.
- ❖ The indicator can be used with MT2IQ software for auto trading.
- ❖ In worst day of trading with the indicator it make 56% win ratio and in best day of trading it make +80% win ratio. But you can increase the win rate by using martingale

**To reach about 70% win rate (statistics are not accurate) use only 1 step martingale.**

- ❖ But you must understand that i have developed my indicator if first trade was loss then it will go for cycle, i mean the next signal will have much win rate and so on until it reach the good signal, and then it will start new cycle again.

### ❖ Here is another example:

- The thumb up it means the trade it ended with profit. The thumb down mean the trade ended with loss.
- If first trade was loss then you should enter the next trade with 1 step martingale.
- If the 1 step martingale was loss then you should stop trading.
- As you can see the two signals before the yellow box was loss trades then you should not enter any more trades and all you have to do is watch the upcoming signals until one signals predict the next candle correct, after that you can continue your trading from start with the new upcoming signal.

**To reach 100% win rate (statistics are not accurate) then use it in GBPU5D M5, USDJPY M15, EURGBP M30. With 6 step max. martingale.**

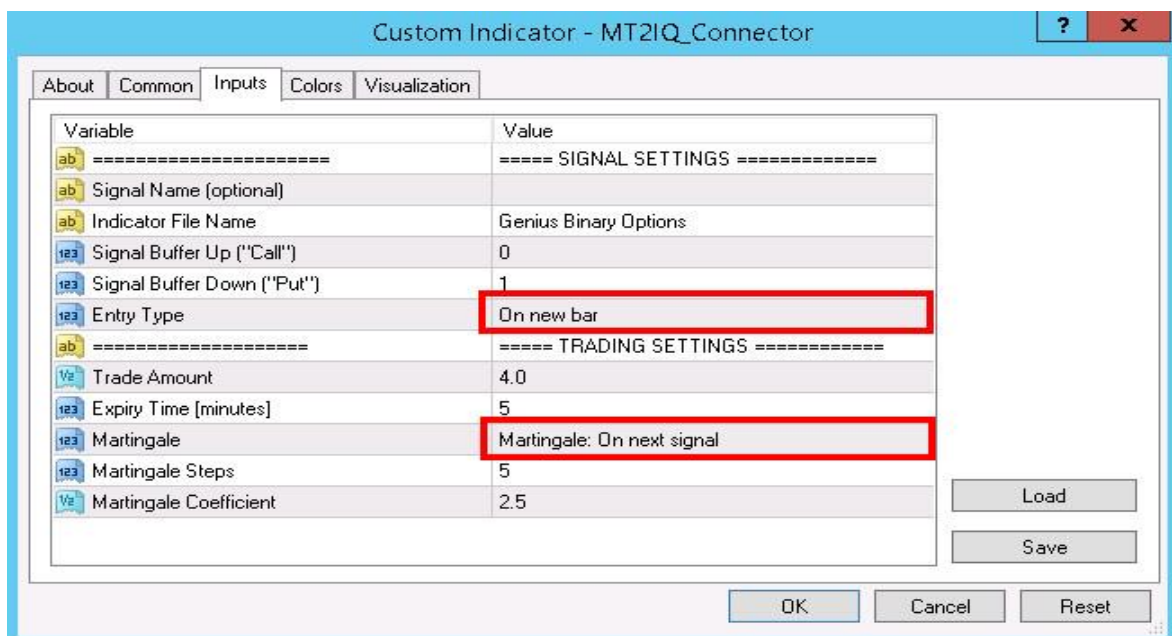

**For using Martingale you need at least 332\$ balance or more for every 1 pair.**

Balance	332\$	500\$	700\$	850\$	1000\$
1 <sup>st</sup> trade	1	1.5	2	2.5	3
Martingale Step 1	2.4	3.6	4.8	6	7.2
Martingale Step 2	5.8	8.64	11.52	14.4	17.28
Martingale Step 3	14	20.73	27.64	34.56	41.47
Martingale Step 4	33.6	49.76	66.35	82.94	99.53
Martingale Step 5	80.7	119.43	159.25	199.06	238.87
Martingale Step 6	193.7	286.65	382.20	477.75	573.30

The indicator can also be used with both MT2IQ & MT2Binary software for auto trading.
