TABLE OF CONTENTS:

CHAPTER 1:

The Forex trading indicator that I use to manipulate the market (ICHIMOKU KINKO HYO).

The ICHIMOKU KINKO HYO strategy was developed Goichi Hosoda, a Japanes journalist who used to be known as Ichimoku Sanjin, which can be translated as "What a man in the mountain sees". He spent 30 years perfecting the technique before releasing his findings to the generalpublic in the late 1960's.

ICHIMOKU KINKO HYO is a technical analyses method that builds on candlestick charting to improve the accuracy of forecast price moves.

ICHIMOKU KINKO HYO is a moving average-based trend identification system and because it contains more data points than standard candledsick charts, it provides a clear picture of potential price action.

CHAPTER 2:
How to set up an ICHIMOKU KINKO HYO Indicator.

1. **Step A:**

- **Double tab on the chart until a circle appears and click the (f) button then choose ICHIMOKU KINKO HYO or**

2. **Step B:**

- **You click the (f) buttonon top of your trading platform.**
- **You click the rubbish-bin button on the top right corner of your platform.**
- **You delete everythingand leave you trading platform NAKED.**

- **You click the (f) button again on the same platform.**
- **You click ICHIMOKU KINKO HYO.**
- **You set 2 pixels on all of the 5 styles.**

- **You click the FILL button on top of the styles then followed by the DONE button.**
- **You ICHIMOKU KINKO HYO Indicator is active.**

CHAPTER 3:

How to analyse the market by using the ICHIMOKU KINKOHYO Indicator.

- **The ICHIMOKU KINKO HYO Indicator has got two clouds (The BROWN cloud and the PURPLE cloud).**
- **It has lines as well (The BLUE line and the RED line).**
- **We use the two clouds and the two lines to analyse the market and to see the price movement (Direction).**

PLEASE READ ATTENTIVELY

1. When to place/open a BUY position:

- **We buy when the red line is above the blue line.**
- **We buy when the price is moving above the cloud(s).**
- **We buy only if we saw that the blue line crossed a candlestick (Bullish Candlestick), and has changed the direction (The trend is going up).**

- **REMEMBER to buy when the price is moving above the cloud(s).**

2. When to place/open a SELL position:

- **We sell when the blue line is above the red line.**
- **We sell when the price is moving below the cloud(s).**
- **We sell only if we saw that the blue line crossed a candlestick (Bearish Candlestick), and has changedthe direction (The trend is going down).**
- **REMEMBER to sell when the price is moving below the cloud(s).**

IF THE PRICE IS MOVING WITHIN THE CLOUDS WE DON'T DO ANYTHING. WE DON'T PLACE/OPEN ANY POSITION, WE JUST LEAVE IT RUNNING AND WAIT FOR THE RIGHT TIME.

CHAPTER 4:
The most important thing(s) about the ICHIMOKU KINKO HYO Indicator.

THE MOST IMPORTANT THING(S) ABOUT THE ICHIMOKU KINKO HYO IS THE "FLATBEAD".

- **FLATBEAD HOLDS THE MARKET FROM FORMING A BULLISH OR BEARISH TRENDS (From going up or down).**

- **A FLATBEAD IS A FLAT STRAGHT LINE FORMED ON THE CLOUD(S) TO INDICATE THAT THE MARKET WON'T MOVE WELL. FLATBEAD REPRESENTS A CONSOLIDATION STAGE (You can place/open a position and the market trades agains you, so to avoid such things, we do not place/ope n any position when we see a FLATBEAD).**

THE STRATEGY THAT I'VE SHARED WITH YOU WILL MAKE YOU A VERY PROFITABLE FOREX TRADER IF YOU FOLLOW THE STEPS ACCORDINGLY.

I Moomela Joshua would like to wish you a very successful Forex trading journey.

I will be releasing the 2nd EDITION PDF before the end of 2017.

THANK YOU AFRICA.

THE END.
