

First, congratulations on making a huge step in your trading journey. We are confident that no matter your previous experience in Binary Options, this will help you reach your financial goals. You joined a passionate community that is willing to guide you and if you have any questions feel free to contact us at any time on our social media pages @binaryoptionsworld!

In order to use the BOW indicator you will first have to install it. No worries, it's a simple process that will take no longer than 10 minutes. We will take it step by step!

STEP1: Install the free MT4 platform

- Go to <https://www.fxcm.com/uk/platforms/metatrader-4/download/>
- Register a new account on their website and download the software
- Install the software
- Register a MT4 demo account and login (it doesn't have to be a real account, but you need to be logged in to use the indicator)

STEP2: Setup the indicator

- Go to the MT4 toolbar and click "File"
- Click the "Open Data Folder"
- Enter the "MQL4" folder and click on "Indicators"
- Copy the "BOW indicator.mql4" file you received from us and paste it in that folder
- Exit and reopen MT4 in order to update

STEP3: Setup the config

- Click "File" again then "New chart"
- Open any asset for your choice (For example EUR/USD)
- Go to the "Navigator" bar on the left and search for "BOW indicator"
- Drag and drop the indicator over the asset
- Right click on the graph and set the candlestick period to 1MIN

Now the only thing you have to do is wait for the alarm telling you to PUT or Call! Be patient and the results will come.

Make sure you also read our other guide, explaining how to snipe the best signals.
