

Setup Instructions

6 Simple steps

1. Install MetaTrader 4
2. UnRar/UnZip BORA files
3. Load NewGen Indicators
4. Open 1M ChartLoad NewGen Indicators
5. Load NewGen Template
6. Receive Signals!

<https://pepperstone.com/en/trading-platforms/metatrader-4-mac>

MetaTrader4 wasn't originally designed for MAC platforms, that's why we'll need to download it through a chosen broker.

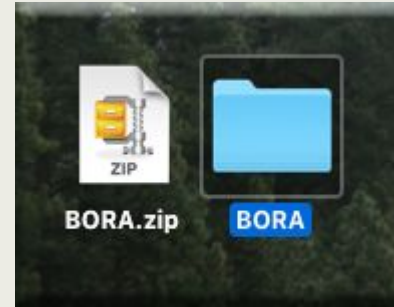

In our case, we choose Pepperstone to operate in 5 minutes timeframes.

The chosen broker is up to the trader.

IMPORTANT: We won't be trading directly on our broker, we'll be just receiving signals.

1. Install MetaTrader 4

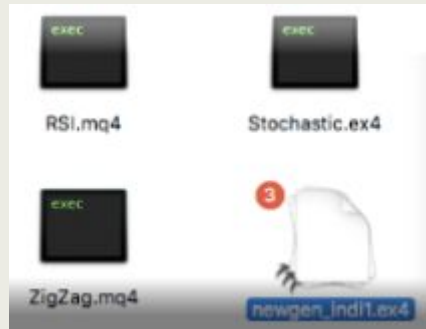

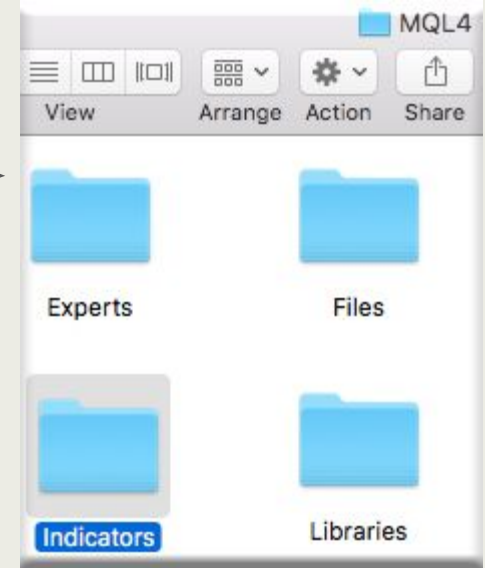

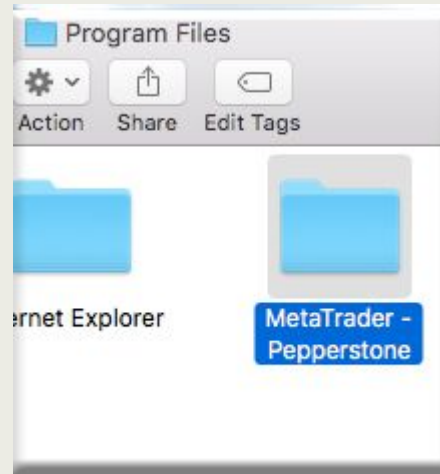

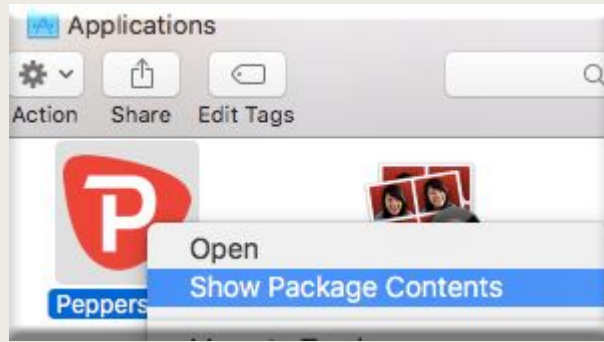

UnRAR/UnZip (WinRAR/WinZip) BORA.zip onto Desktop or your chosen folder

2. UnRAR/Zip BORA files

A. Locate Indicators Folder

Finder / Applications / Pepperstone (our case) / Show package contents / drive_c / Program Files / MetaTrader
- Pepperstone (our case) / MQL4 / Indicators

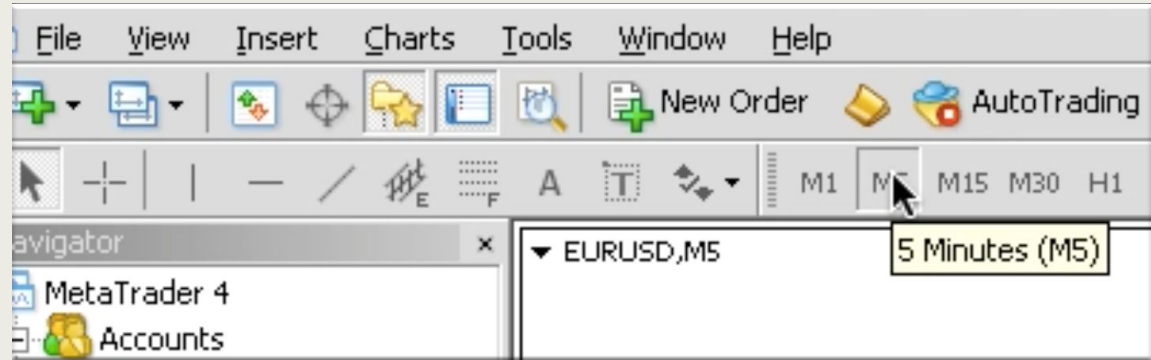

B. Drag NewGen Indicators
into Indicators folder

3. Load NewGen Indicators

A. New Chart

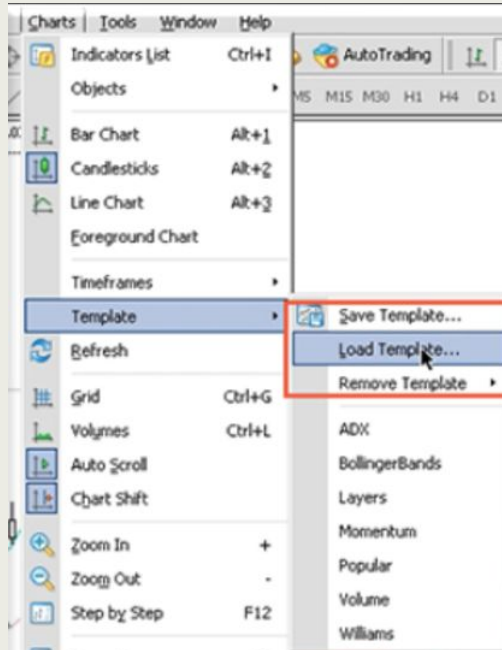

B. Set up for 5 minutes

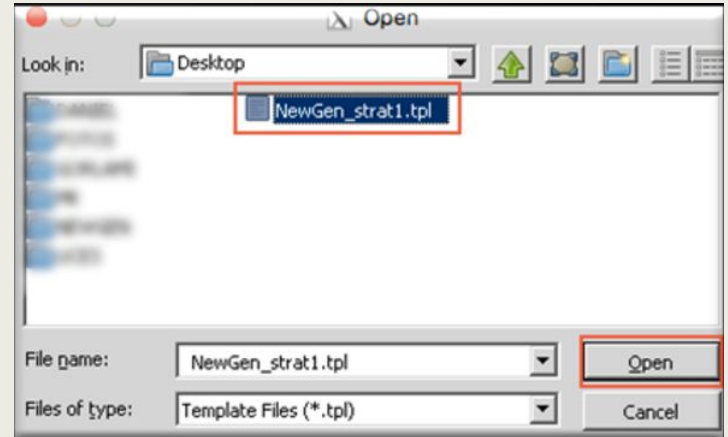

4. Open 5M Chart

A. Charts / Template / Load Template

B. Open NewGen_strat1.tpl

5. Load NewGen Template

6. Receive Signals!
