

DO NOT over-trade. If you feel you are making mistakes or that the market is being bad to you, close your PC and come back tomorrow with a fresh outlook.

Do not over-risk and never try to take revenge on the market. People have lost their livings doing that. Don't think you are different. Trade ONLY the clear trends and moves. Don't get into trades that you doubt. Remember, trading is NOT about taking more trades and being more active. Trading is about taking less trades, but the best ones.

If you take 100 trades per month, or only 10, you still can end up with the same result and percentage growth. So wait for the best setups, and trade them.

And remember: NEVER give up! There are no shortcuts in a marathon. But when you reach the finish line, nothing feels better! Remember also, the only difference between winners and losers is that the losers give up sometimes one step before they become winners.

I wish you the best of success and I am always here to help you and support you.

Thank you!

Yours,

*Vladimir Ribakov*
