

2) The "Divergence Line"

Note: I will cover detailed explanations on divergence in DVD 1. For purposes of using the dashboard, all you need to know is that they are represented on the dashboard and will alert you to whether a trading rule has been complied with or not.

Image 7

You will notice **two divergence signs** that will **appear on the "Divergence Line"** as shown in image 7. One on the left and one to the right of that.

In order to trade with the odds in our favor we must make sure that we don't trade against higher time frames' divergences.

- **The First divergence sign** (that appears on the left) alerts us as to whether there is a divergence, or not, by scanning for divergence **on both higher times frames**. If there is no divergence the sign will appear as a **green** mark.
- **The Second divergence sign** (that appears on the right) alerts us as to whether there is a divergence, or not, **on the time frame we intend to trade on**. If there is supporting divergence the sign will appear as a **green** mark.
