

# OrderFlows Delta Trading Course

Lesson 3 – Delta Numbers

# Disclaimer

This presentation is for educational and informational purposes only and should not be considered a solicitation to buy or sell a futures contract or make any other type of investment decision. Futures trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results.

CFTC Rules 4.41 - Hypothetical or Simulated performance results have certain limitations, unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not been executed, the results may have under-or-over compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profit or losses similar to those shown.

When dealing in order flow delta there are different delta numbers you can look at:

Delta – Which is the current delta reading for the bar and when the bar closes is the final delta for the bar.

Max Delta – The most positive delta was in a bar.

Min Delta – The most negative delta was in a bar.

Cumulative Delta – The running delta for the session.

Cumulative Delta / Volume – The cumulative delta divided by the total volume for the session up to that point in time.

When looking at delta the type of chart you look at will give you very different delta readings.

Minute based chart versus range based chart.

Range based charts give you clearer reading on price movement than time based charts because a new bar will only form if price is moving.

Delta – is the difference between aggressive buying and aggressive selling in a bar. While the bar is forming, the delta number is constantly changing as trading is occurring. The delta will go positive or negative. Once the bar is closed the delta will not change.

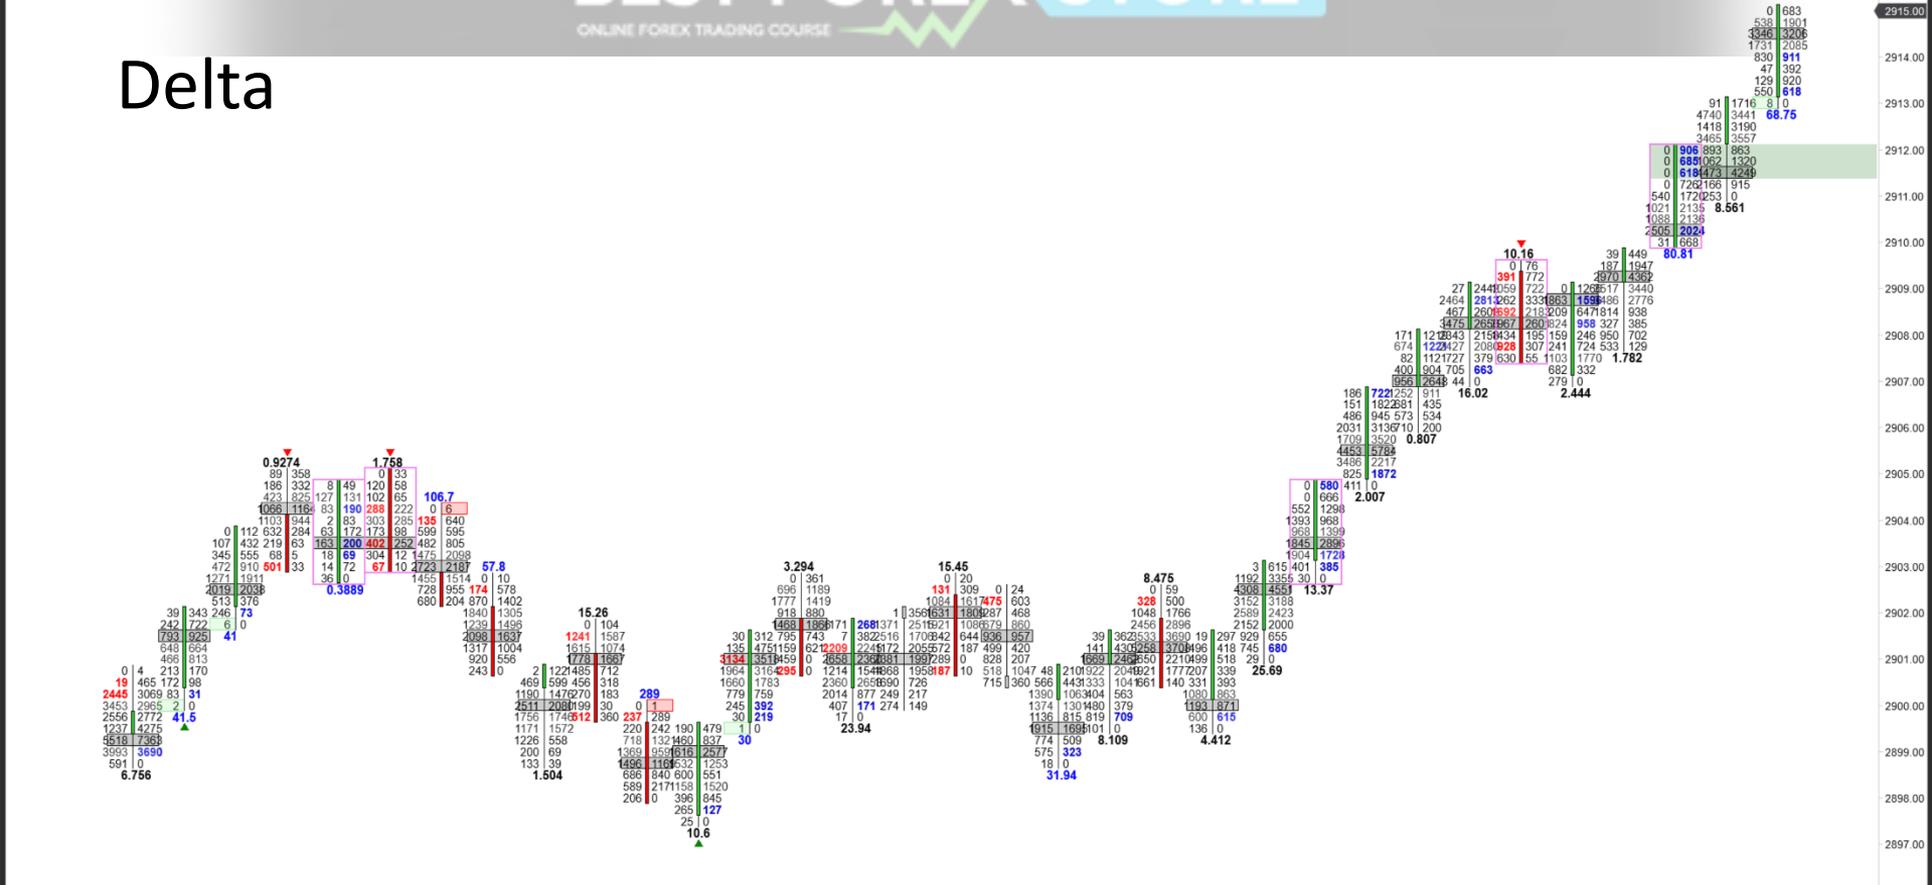

Delta – You have to remember that delta in a bar, while the bar is forming, the delta value can change from a strong positive to a strong negative and vice versa. You need to be careful taking a trade early while a bar is forming based on your thoughts of delta because it can change in an instance.

Delta is related to volume. When an underlying cash market opens and volume picks up the delta numbers overall will generally be bigger.

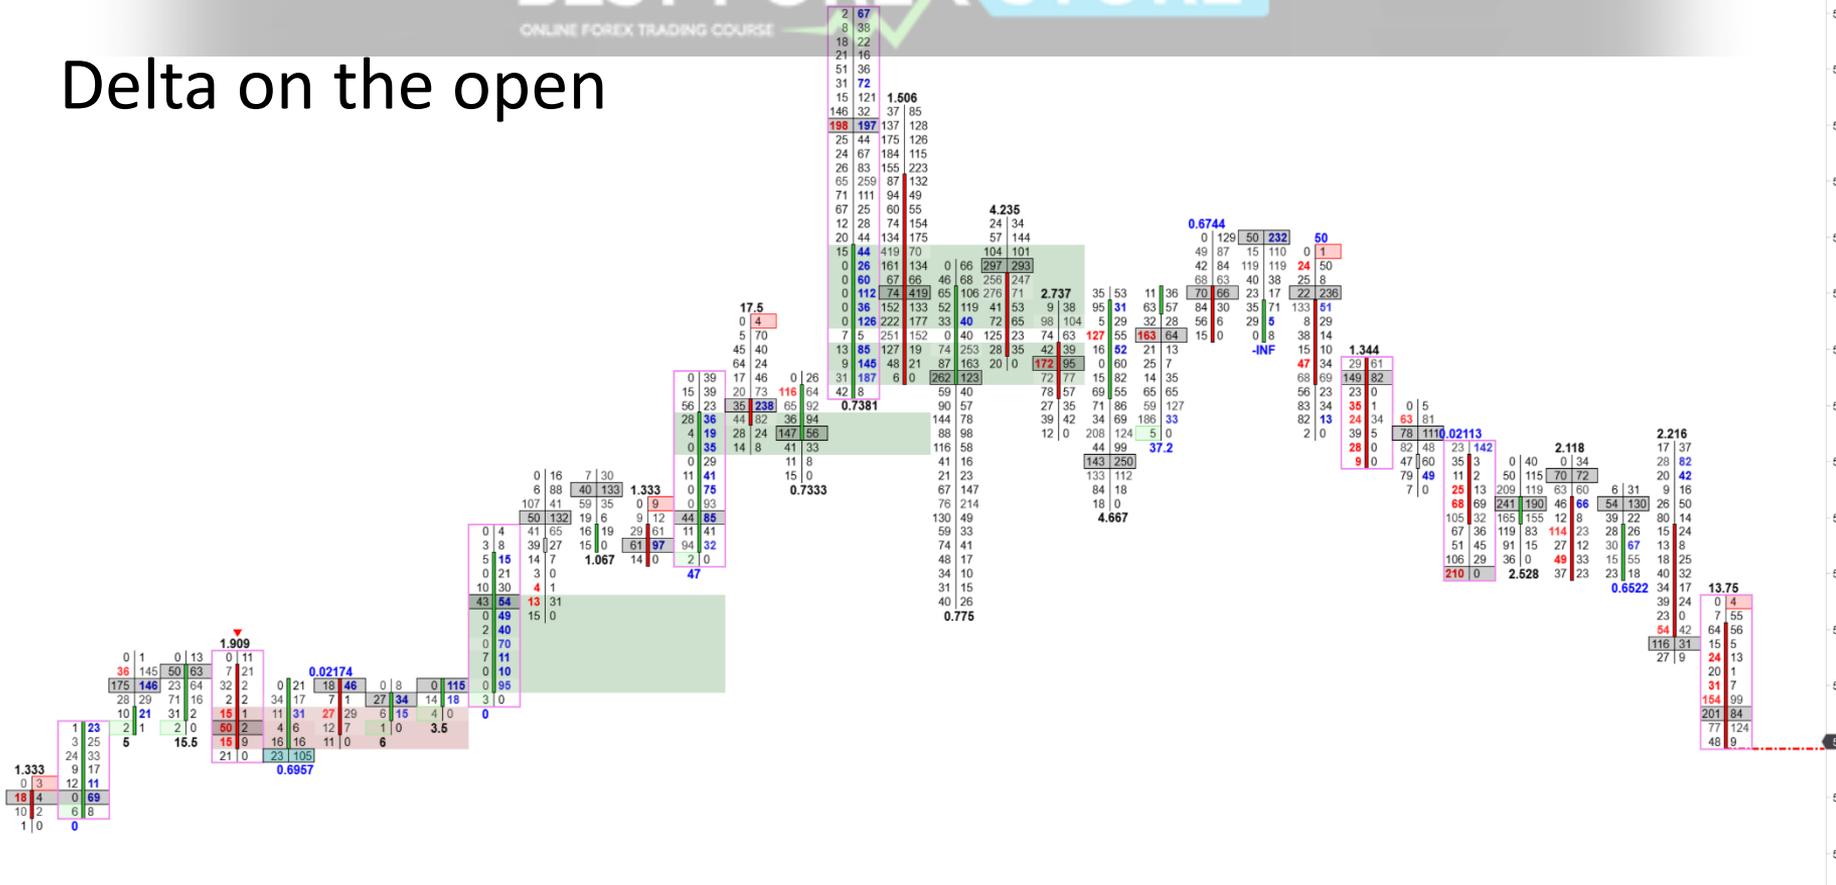

Opening and closing times may exhibit larger than average delta numbers due to the larger than average volume at the time period.

## Delta on the open

Max Delta is the strongest delta was on the positive side. This means how strong aggressive buying was at one point in the bar. A final delta value that is close to the max delta value indicates aggressive buyers dominated the bar.

## Max Delta

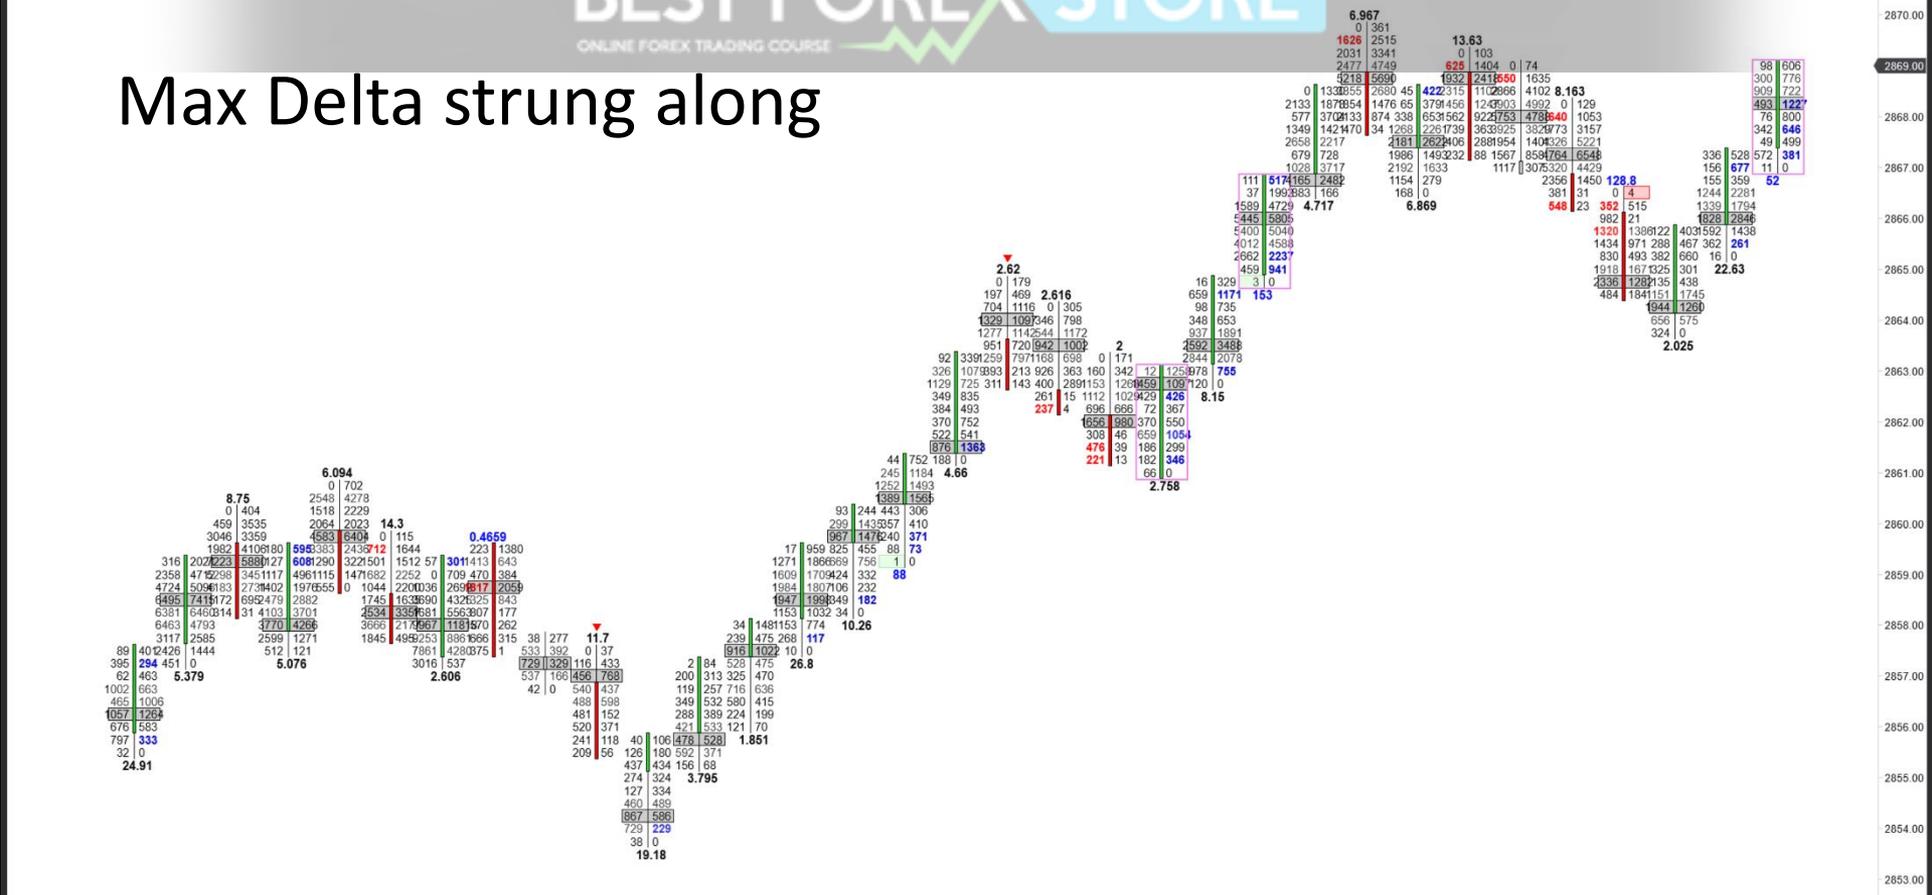

Delta	47	438	370	-100	-426	-3675	336	-727	282	-165	-551	-195	-1494	197	458	948	-321	-393	1223	813	1163	222	355	29	368	615	30	1413	274	371	193	1692

Min. Delta	43	-54	-1	-544	-635	-4106	-26	-1459	-120	-328	-944	-963	-1495	-329	-2	-281	-321	-458	-16	-327	-25	-241	-426	-537	-298	-22	-623	0	-253	-405	-138	-3
Volume	63	2792	3336	4580	4722	16573	5648	5791	5840	4903	8397	8103	6752	4597	6710	7230	3743	4999	7567	5525	5223	4528	4353	3227	4078	6487	4478	8923	5906	10919	5899	7762

What I like about Max Delta is when, over a few bars, the Delta finishes near the Max Delta and the Min Delta is relatively small, it indicates strong aggressive buying and the strength often builds on itself and the markets tend to rise.

## Max Delta strung along

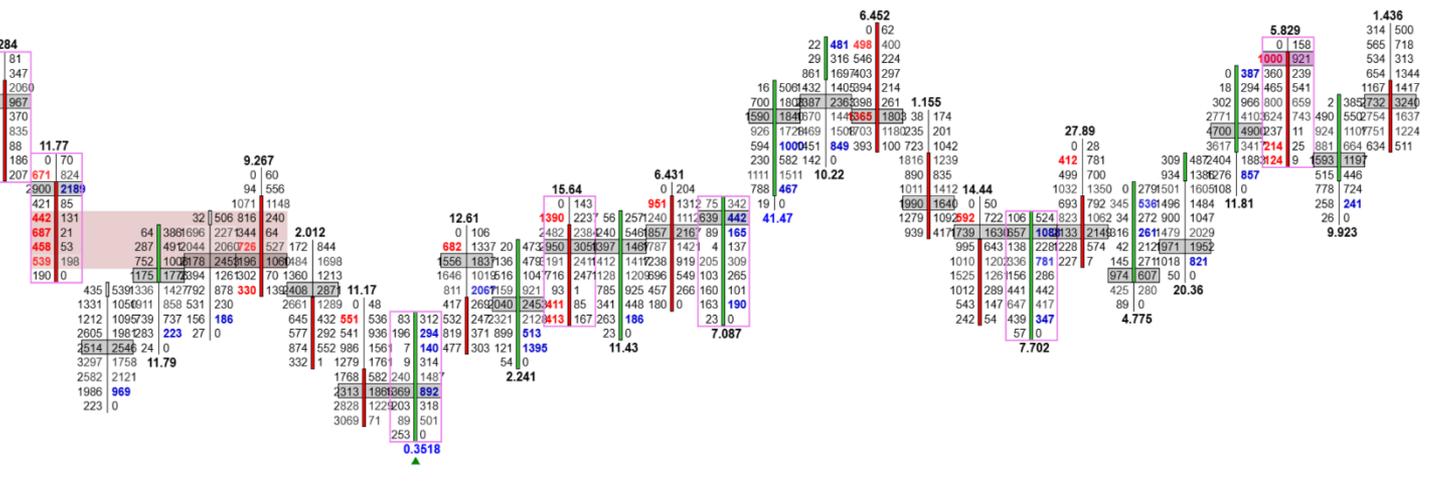

Delta	95	515	627	1485	658	2525	-1602	-715	-81	-416	470	227	850	1346	2095	1891	-545	-178	-1228	1962	2508	6131	4166	2056	345	-1332	351	1933	-3129	522	3156	2807
Max. Delta	08	3248	768	4528	2698	2582	914	25	326	32	472	256	1030	1439	2139	1892	1082	1395	892	1974	2524	6158	4166	5647	390	74	2870	3318	120	575	3253	2852
Min. Delta	74	-1444	-1464	0	-655	-3618	-1603	-853	-288	-704	-130	-137	0	-30	0	-547	-182	-1241	-59	-248	0	-569	0	-1608	-1420	-132	-524	-3462	-996	-55	-258	
Volume	574	869	3120	5597	3011	6547	14026	3043	6226	5780	7593	19674	8878	10213	10363	12297	9470	10336	8832	19692	45567	31110	41384	19139	17202	43621	42149	16183	11176	17212	8507	

Min Delta is the strongest delta was in the negative side of a bar. Meaning how strong aggressive sellers were in the bar. A close near the min delta number indicates aggressive sellers dominated the bar.

What I like about Min Delta is when you string together a few bars where the bar Delta finishes near the Min Delta number it is a great potential short opportunity.

There are different ways to analyze the max and min delta that give a trade an insight into the market not visible anywhere else.

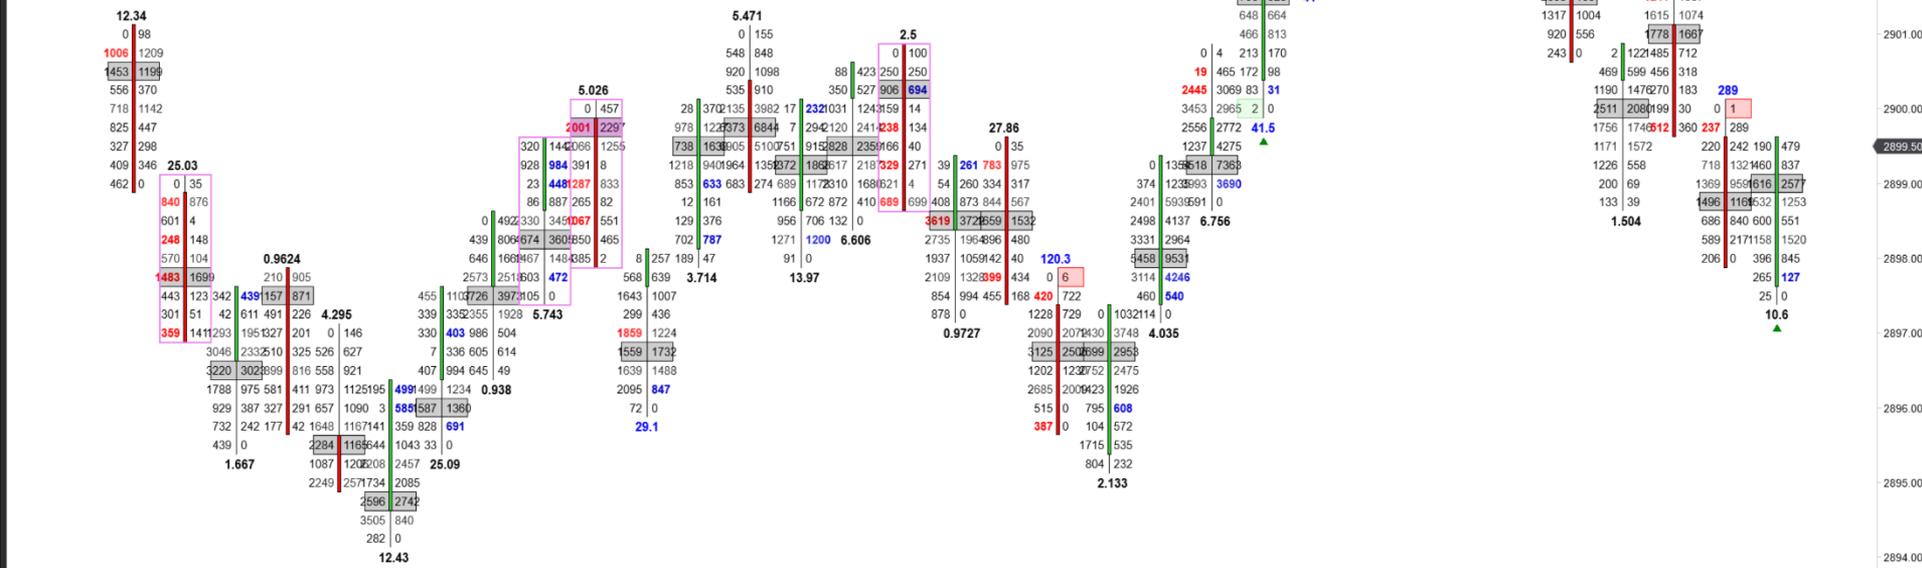

It can help you to see shifts in supply and demand.

How can you see shifts in supply and demand?

There will be bars that have a large max delta value and a large min delta value, then closes near one or the other.

For example, a market has a min delta of -1766, a max delta of 2359 and a delta of 2359. Which way do you think the market is going to go? Higher or lower?  
Higher.

## Min to max delta shift

Personally I think cumulative delta can be a lagging indicator because for a market spend hours putting together bars with positive delta to give you a positive cumulative delta, that it will take many bars of negative delta to turn the cumulative delta negative.

# Cumulative Delta

There are some traders who say “trade in the direction of the cumulative delta.” I find that incredibly bad advice because for example, if you are trading a 1 minute ES chart and the cumulative delta is positive 32623 and you get a short signal you won’t take the short trade and you could miss a lot of otherwise great trades. On a minute based chart where you only get bar deltas in the hundred, it will take a lot of negative delta bars to turn the cumulative delta negative.

## Cumulative Delta

Those are the issues I have with cumulative delta. That is not to say it is not a useful tool. Instead I just want to show you the pitfalls of cumulative delta.

Cumulative Delta / Volume is the cumulative delta divided by the total volume for the session at that point in time.

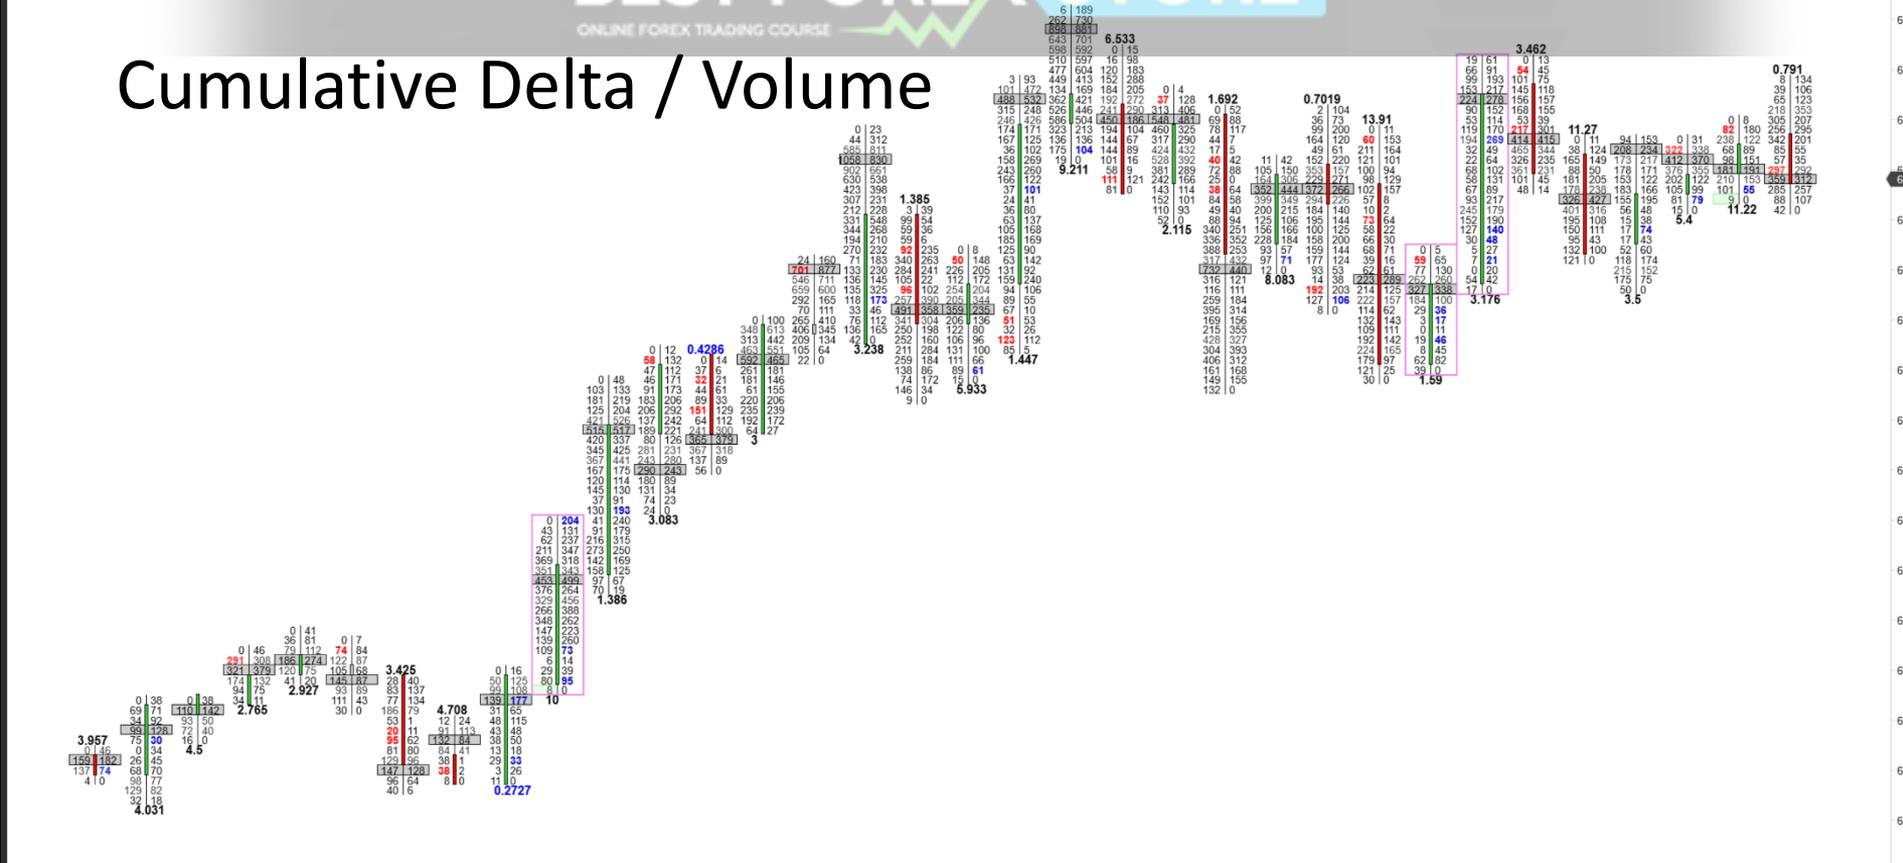

When the ratio is close to zero it is indicative of a small cumulative delta.

The thing is total volume will always be growing while cumulative delta can expand or contract.

What I look for is areas where the cumulative delta/volume is close to 0.000 and then look to trade in the direction of the strong delta that follows.

It is kind of an area of absorption and consolidation, traders are nearly equal for the session and I am just waiting to see the direction the market goes.

Order Flows Trader, LLC	1059	124620	126485	127550	128695	130568	131236	132521	140000	149081	153928	156973	163200	170076	182925	189658	193499	201512	214316	218447	225375	236121	240153	246285	251569	253773	258631	263427	267379	271880	274067	276003	280926	

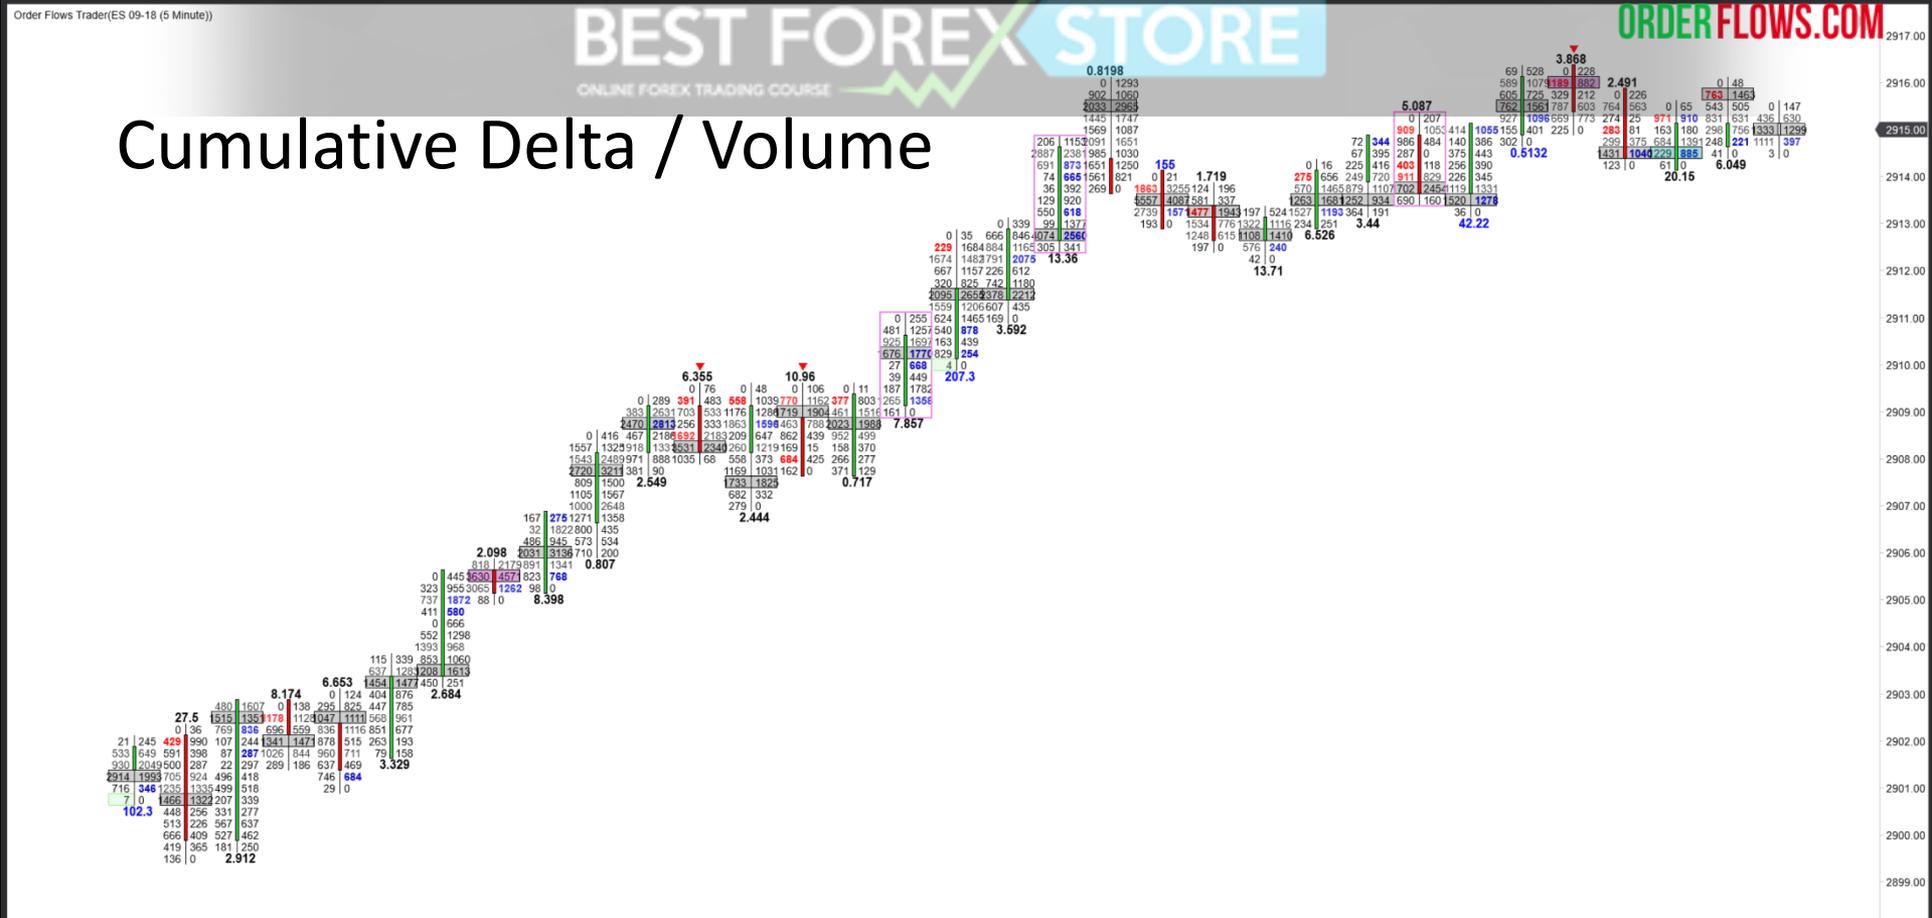

I also look for areas where it is quite high (in an absolute sense). A ratio above 0.050 is what I consider high.

It shows an underlying strength in the market.

A lot of times the cumulative delta/volume is so small that it is useless.

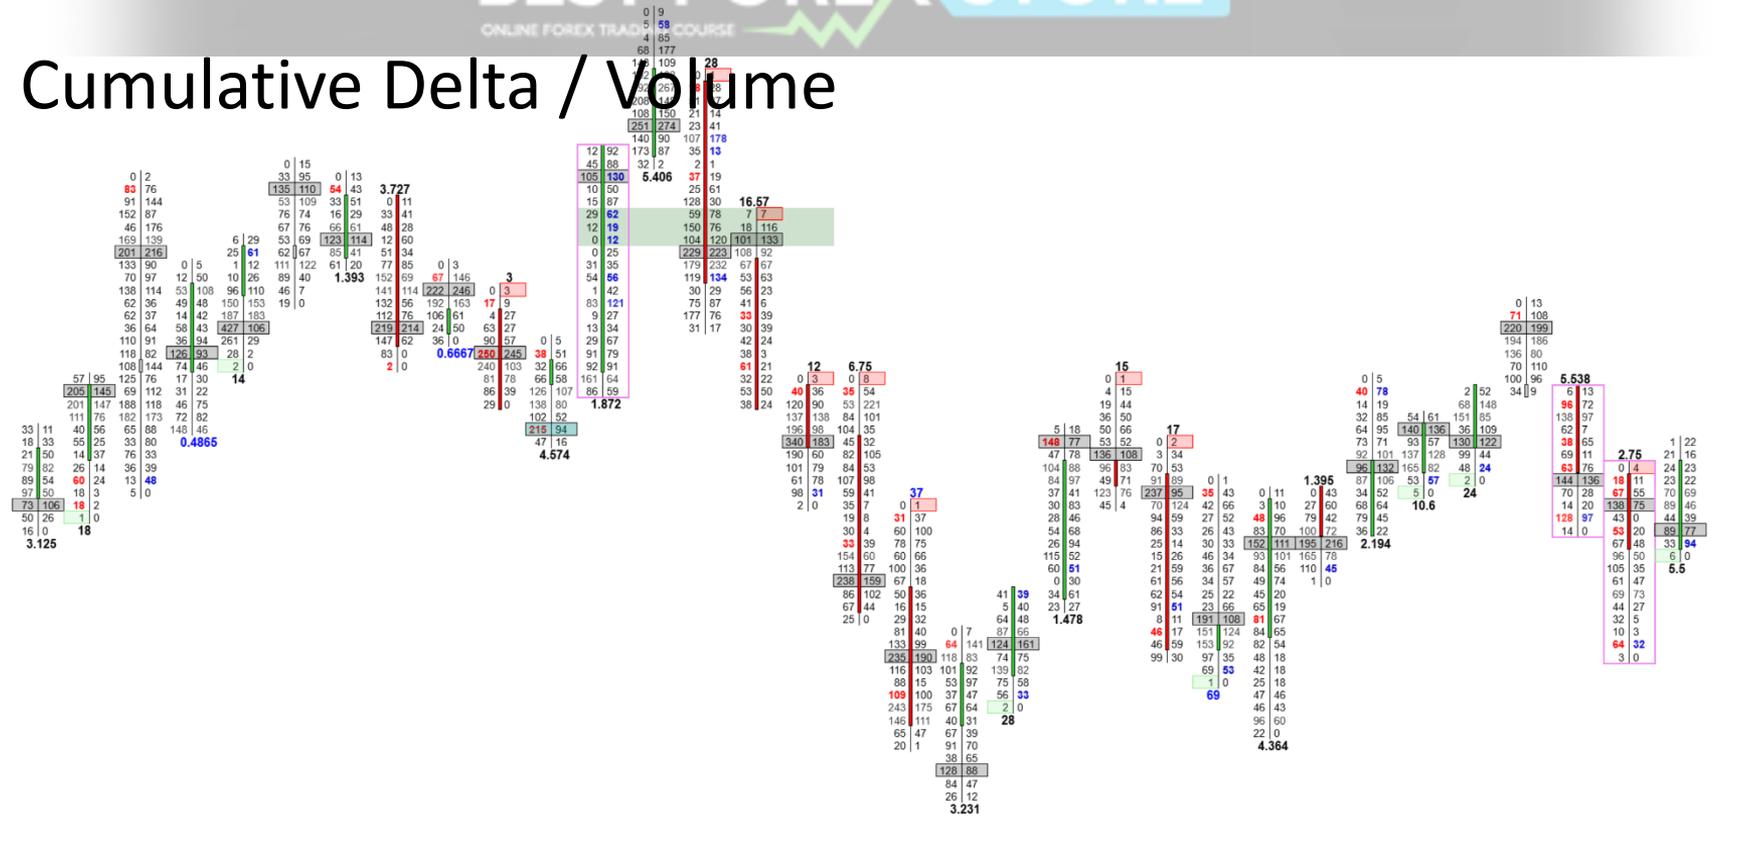

# Cumulative Delta / Volume

Another problem with Cumulative Delta / Volume is over time it can flatten. As the day goes on changes are minor. So it will be difficult to see any changes have an effect on the market.

I will admit I don't pay much attention to the cum delta/volume ratio. Personally I just find there is a lot of other information in other forms of delta that is more useful.

By now you should understand the different types of delta numbers available for your analysis and more importantly you should understand what they mean and how to use them.

This is the end of lesson 3. In lesson 4, I will explain in detail order flow delta setups so that you can start looking for them yourself.
