

MME DIGITALS: THANK YOU!

Thank you very much for your purchase.

You have purchased an Expert Advisor (EA Robot): Please note the following guidelines:

All Eas are tested and are working, the performance depends on different technical specifications in each Broker and on different account types:

- ✓ Leverage (1:100 is not the same as 1:500)
- ✓ Spread (ECN Brokers with low or flat Spread will always give better performance and in some cases like Scalpers EAs, they are absolutely necessary otherwise no trade will be open due to a tiny SL and/or TP).
- ✓ SL and TP: You should know : What are the minimum TP and SL allowed by your broker? Because, some robots have their configuration based on SL and TP minimums.
- ✓ Minimum Deposit (in some robots, which open simultaneous trades in different currencies the money is for each pair, be careful with that).
- ✓ If the robot does not open trades: there is some configuration that does not match or is not allowed with your Broker (any of the ones I have mentioned above, please check them out)
- ✓ **The delivered configuration is the one that works perfectly according to the technical descriptions published in the advertisement. The specifications of your broker should match the detailed descriptions in the advertisement. If something does not match, and the Robot allows it, you can change the pre-set configuration and you will have to test in DEMO ACCOUNT in real time (not backtest) your new configuration to see how it works.**
- ✓ WE DO NOT PERFORM CUSTOM CONFIGURATIONS

BONUS

IF YOU LEAVE US A NICE AND POSITIVE REVIEW ON EBAY

YOU CAN GET COMPLETELY FREE:

One of the EAs in our store .Please visit our store to check the features of each EA. You can keep the one you like the most! It doesn't matter if the price is not the same :)

Regards, MME.
