

Trigger price action (MTF Trading system)

Hello friends

First of all, I would like to thank the agents of Forex Station for confirming me as a user and giving me this unique opportunity.

I personally believe that this system will end forex once and for all and this market has nothing to hide anymore. Trading with this style is very enjoyable for me because it is designed based on the reality of the market and all aspects of the market are considered. In fact, this method is a combination of price action, volume trading, and indicators that have been put together correctly. Also, we will consider additional parameters and be very cautious to enter the trade.

You will receive the following:

- 1- Trading plan
- 2- Trading system
- 3- Trigger price action check list
- 4- Trading journal
- 5- Indicator
- 6- Expert
- 7- Main template
- 8- Watch list template

In this method, for more mastery, it is better to use 3 screens. Screen number 1, which shows the transaction terminal. Screen number 2 which is our main trading symbol and screen number 3 which is our watch list. Also, 2 templates will be provided to you, both of which are used simultaneously. In fact, one of them runs on the main trading symbol and the other on the watch list. On the main trading symbol, we will start to implement price action steps in different time frames and specify the appropriate ranges to enter the transaction, and in the watch list, we will look for the confirmation of entering the transaction in the lower time by checking additional parameters. Also, with the help of the watch list, the volume in transactions will be fixed for you in general, and due to the bias of mismatched currency pairs, you will have very confident entry points.

As the name of this method suggests, it is necessary to perform the price action steps on the chart, in fact, this method helps to analyze the price action and you will have enough reasons to enter the transaction and secure points. Items such as trading plan, trading system, triggers, trading journal are provided to you to help you have a framework and order and observe them in trading.

In the end, due to the critical situation that occurred in my life, I was planning to sell this method in mql5.com unfortunately, my account was not approved due to the sanctions, and I have to share my wallet and Tether with you. You can help me with any amount you like. I hope you understand me and don't judge me. Also, if you have financial problems, you don't need to make a deposit. I hope this system can help.
