## **Risk warning**

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

# System overview

System contains three indicators.

1. Background Indicator.
2. Entry/Exit Indicator.
3. Info Dashboard

Forex-Shop.Net

#No1-Budget Forex-Shop in the Net

## HOW DOES IT WORK.

System uses dynamic background trend control.

### WHITE BACKGROUND = TREND IS DOWN

### BLUE BACKGROUND = TREND IS UP

## STRONG SIGNALS (Trading with the flow):

- UP Arrow Signals + UP Background
- DOWN Arrow Signals + DOWN Background

## MODERATE SIGNALS (we recommend to trade those only with half your lot size):

- UP Arrow Signals + DOWN Background
- DOWN Arrow Signals + UP Background

---

### ENTRY EXAMPLES:

White Background = DOWN TREND

- 1 – Strong SELL
- 2 – Strong SELL
- 3 – Strong SELL
- 4 – Moderate BUY

ENTRY EXAMPLES:

Blue Background = UP TREND

- 1 – Strong BUY  
2 – Strong BUY  
3 – Strong BUY  
4 – Moderate SELL

Please note that the moderate signals are not always bad. It means just that such signal is AGAINST the main trend and it is just more risky than going with the market flow.
