Walkthrough

A GUIDE THROUGH THE WORLD OF INTERBANK TRADING CONCEPTS

MARKET STRUCTURE MASTERCLASS

In MS MasterClass Discussion:

- ICT Market Structure Essentials
- The Higher Time Frames Protocol
- ICT Market Structure Advanced
- ICT Advanced Market Structure with Order Blocks
- Swing Projections for Market Structure Targets
- High Probability Trading vs Low Probability Trading

A low-angle, upward-looking perspective of several tall skyscrapers at night. The buildings are dark, with many windows illuminated from within, creating a grid of small, warm yellow lights against the dark facades. The sky is a deep, dark blue-grey. The perspective creates a sense of height and scale, with the buildings converging towards the top of the frame.

HIGHER TIME FRAME PROTOCOL:
**WHEN ANTICIPATION
BECOMES CONFIRMATION**

We do not gamble, we execute on solid setups.

an·tic·i·pa·tion - expecting that something will happen

con·fir·ma·tion - the process of supporting a statement by evidence

Our setups are plentiful and repeat frequently.

We do **NOT** execute before there is evidence in Price.

We know, understand and trust Price's characteristics and repeating phenomenon.

Nothing we do is a guess.

A low-angle, upward-looking perspective of several tall skyscrapers at night. The buildings are dark, with many windows illuminated from within, creating a grid of small, warm yellow lights against the dark facades. The sky is a deep, dark blue-grey. The perspective creates a sense of height and scale, with the buildings converging towards the top of the frame.

HIGHER TIME FRAME PROTOCOL:

USING OUR LEVEL FROM THE
LONG-TERM PERSPECTIVE

The steps of Anticipation are as follows.

1. Before we can anticipate reversals at levels, we must conclude that our trading level is one of high probability.
From that level, we ANTICIPATE that it will act as Parent Order Flow for future moves to come.

Before we hunt into the Lower Time Frames,
we must find the Draw on Liquidity.

We first target Internal Range Liquidity, then the External Range Liquidity.

31/3/2022

ES1! | D

When Price trades into our Key Level, we "anticipate" it to act as the Parent Order Flow for moves towards the Draw.

We then look for "Confirmation" on the Intermediate Term Perspective.

4/4/2022

ES1! | D

Expect Consolidations to occur at the 50% of a Price Range.
 This will save yourself from getting chopped in Seek n Destroy scenarios.

A low-angle, upward-looking perspective of several tall skyscrapers at night. The buildings are dark, with many windows illuminated from within, creating a grid of small, warm yellow lights against the dark facades. The sky is a deep, dark blue-grey. The perspective creates a sense of height and scale, with the buildings converging towards the top of the frame.

HIGHER TIME FRAME PROTOCOL:

INTERMEDIATE TERM PERSPECTIVE FOR CONFIRMATION

MARKET STRUCTURE BREAKS

A dark, moody background featuring a broken metal chain. The chain is split into two main sections, one on the left and one on the right, with numerous small, dark fragments of metal flying through the air between them. The lighting is dramatic, highlighting the metallic texture of the chain links and the sharp edges of the debris.

The secret behind Market Structure Breaks is Narrative.

What is the reason behind the Market Structure Break?

Failure to understand the "narrative" will make you fall victim to false Market Structure Breaks.

Interbank Trader:
"I'm anticipating the Narrative to switch"
"An MSB will confirm this!"
"I'm going short on the Lower High."

Retail Trader:
"It just made a Higher High!"
"Long the breakout!"

We must frame Market Structure Breaks from the Long-term Perspective.
We can then start looking for an MSB for confirmation on an Intermediate Term Perspective.

Since the level has now been confirmed, we expect the Long-term Perspective level to act as Bearish Parent Order Flow.

We want to see Bearish Institutional Order Flow occur now.

- Displacement to the downside
- Support levels breaking
- Resistance levels holding
