Master Trader Secrets

SERIOUS TOOLS FOR SERIOUS TRADERS

Smart Money Indicators

POI Box & 50% Fib

This indicator is one of a collection of eight 'Smart Money' Indicators for MT4:

- Breaker Blocks
- Choch & BOS
- Fair Value Gaps
- Kill Zones
- Order Blocks
- Origin Order Blocks
- POI Box & 50% Fib
- Unmitigated Order Blocks

Point Of Interest (POI) Box & 50% Fib

This indicator allows you to MANUALLY add a highlight box to any POI you wish (order blocks, fair value gaps, etc) it then adds a 50% level line automatically.

It also gives you the option to have alerts trigger from both the POI box outline and/or the 50% fib line.
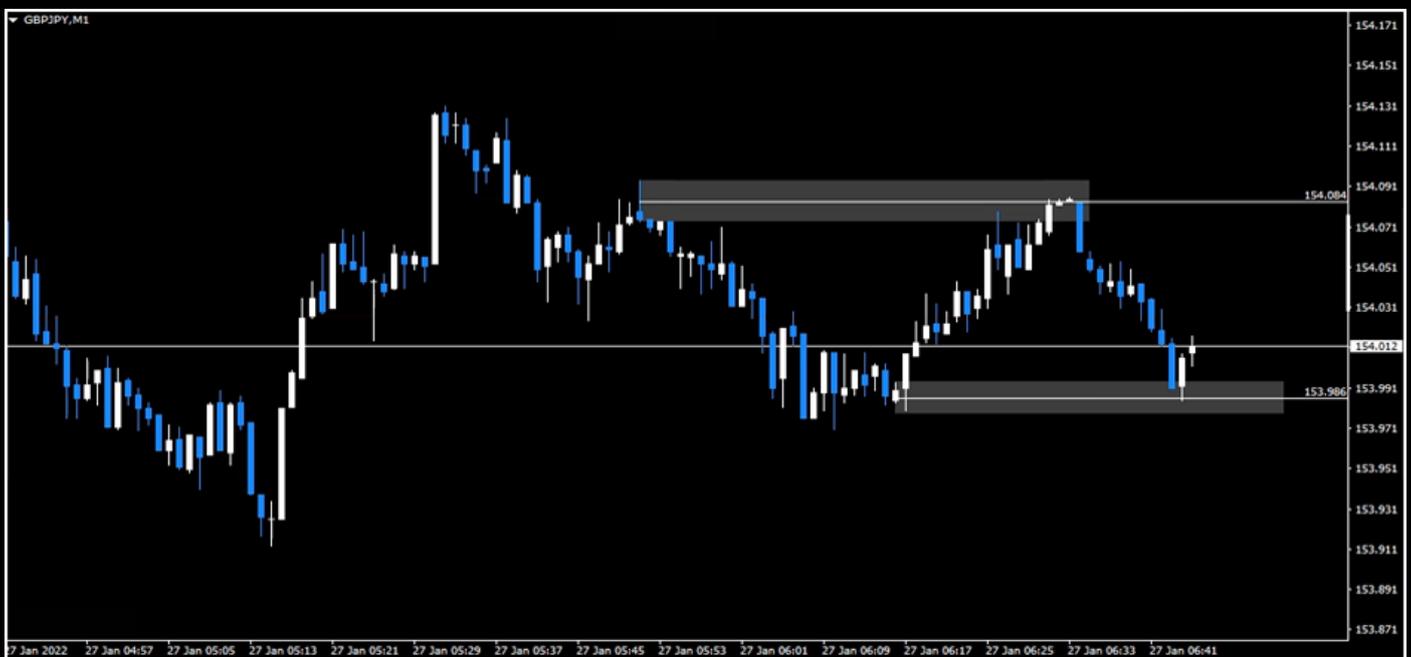

Why a 50% (equilibrium) line?

Price should not breach the 50% level of a good order block or FVG, so your trade entry should be placed from the open to the 50% level of the POI. Because all 'smart money' traders recognise this fact, this indicator makes the process of marking up the open and 50% level of any POI much easier.

If you're a 'smart money' trader you're probably familiar with constantly adding a 'box' to a POI to highlight it:

Box → Fib tool → Add Line → Order Block + 50% line
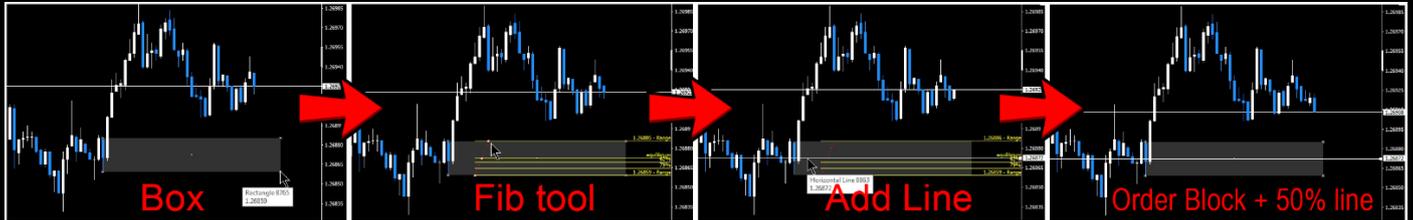

Then if you want to mark the 50% level of the POI you had to:

- Place the Fibonacci tool over the box
- Mark the Fibonacci 50% level with a horizontal line
- Then delete the Fibonacci tool
- This left you with a highlighted POI & the 50% level marked up…

Now you can achieve all this in a couple of steps using the POI Box and 50% Fib indicator!

Indicator Features:

- Manually highlight any POI (Order Blocks, Fair Value Gaps, etc) on any chart
- 50% Fib line function - Automatically determines the 50% level of any POI
- Easily added to any chart using the 'backslash' key (\ ) on your keyboard
- Alerts on price touch of POI box
- Alerts on price touch of 50% Fib line
- Alerts to Popup, Push & Email

Function Notes:

- Wherever you click your mouse in the chart is where the POI Box will appear when you press the backslash (\ ) key
- Alerts trigger: **every time** price touches:
  - The POI Box outline (if activated in the settings)
  - The 50% Fib line (if activated in the settings)
- Alerts **will still trigger** if price hits the price level when it's PAST the POI box outline
- **Wicks Matter?** - Wicks **DO** count (to trigger alerts) for any candle that touches either the rectangle outline or the 50% Fib line

Input Tab:

- **===== Fib Settings =====**
- **Fib Color** - Select the color of your choice
- **Fib Line Style** - Select the style of the Fib line (solid, dot, etc)
- **Fib Width** - Select the width of the Fib line
- **===== Rectangle Settings =====**
- **Height** – Select the default height of the POI Box
- **Bar Count** – Select the default length of the POI Box
- **Rectangle Colo**r - Select the color of your choice

4 | P A G E

- **Style of Rectangle Lines** - Select the style of the rectangle line (solid, dot, etc)
- **Width of Rectangle Lines** - Select the width of the rectangle line
- **Filling the rectangle with color** - Select true or false
- **Background Rectangle** - Select true or false
- **Highlight to move -** True or false (select true to have default POI box moveable)
- **Hidden in the Object list –** Select true or false
- **Priority for mouse click** – Leave set to 0
- **Draw an initial Rectangle** – Automatically adds a rectangle if set to 1
- **===== Alert Settings =====**
- **Popup Alert** - Alert will trigger the popup window and an alert sound
- **Push Alert** - Alert will trigger a message sent to your cell phone (if you have the 'push' notification activated in your MT4 Options)
- **Email Alert** - Alert will trigger a message sent to your email address (if you have the 'email' notification activated in your MT4 Options)
- **Touch Box Outline** – Alert triggers on price touching the rectangle outline
- **Touch Fib Outline** – Alert triggers on price touching the 50% Fib line

Display Options:

To place a new highlight box on any POI, simply click anywhere in the MT4 chart then press the 'backslash' key (\ ) on your keyboard:

A new POI box will appear on the chart (in the spot that you clicked your mouse):

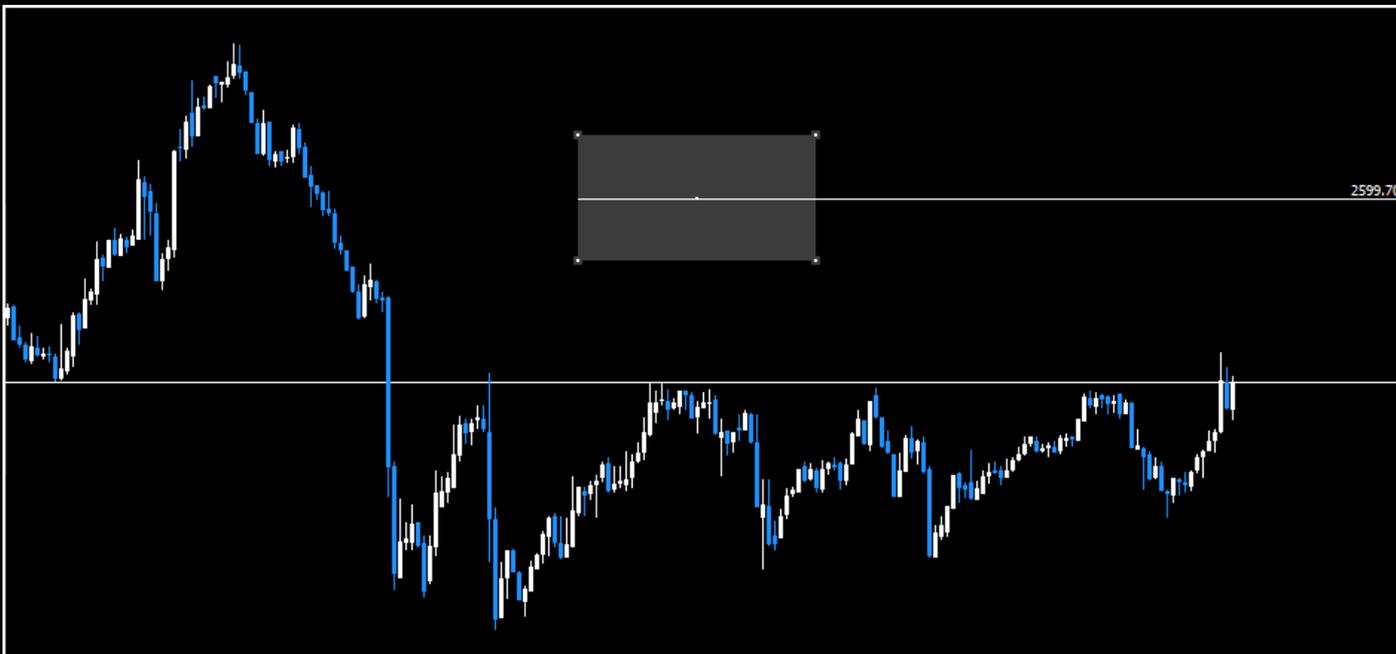

You can then move the box to the POI you wish to highlight and adjust its size to fit. The 50% fib line function in the indicator will then automatically adjust to the 50% level of the box (and show the price at the right hand side of chart):

You can add multiple boxes to the chart and highlight multiple POI's:
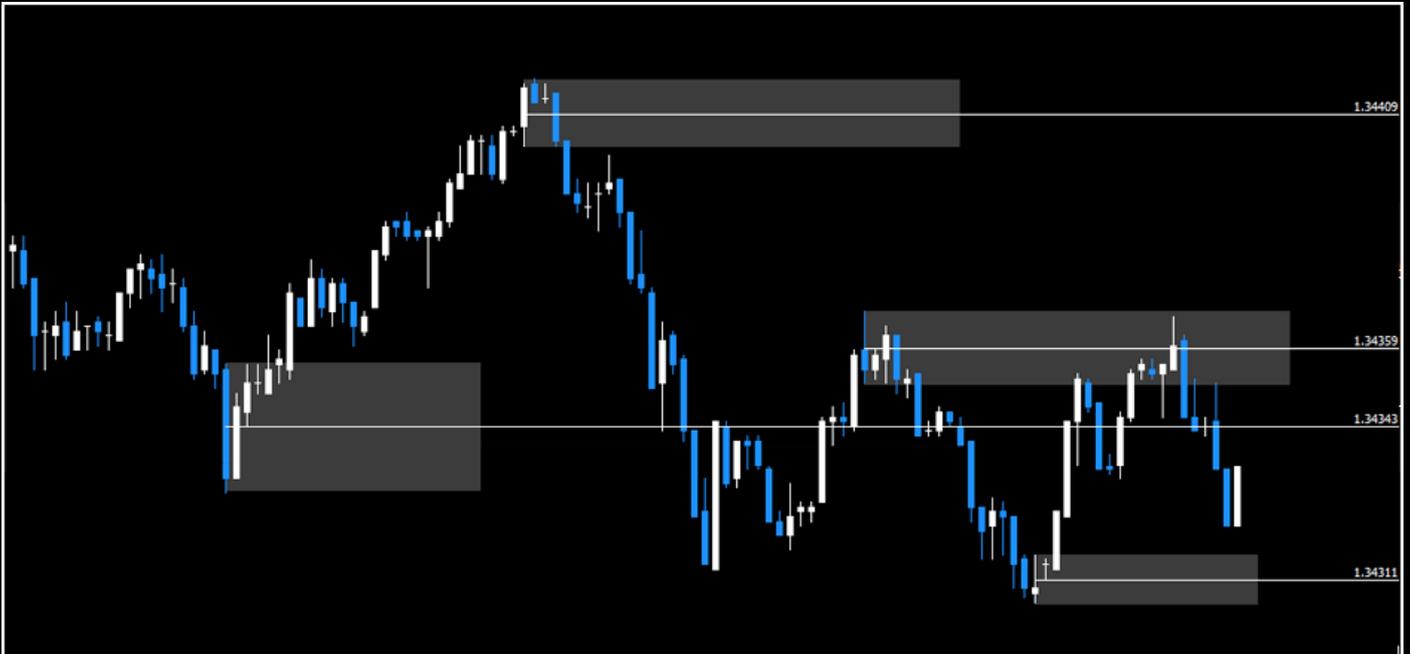

POI Box Outline Alert: the Alert will trigger instantly when price touches the POI Box outline

The Alert will still trigger if price hits the price level when it's PAST the POI box outline

POI Box 50% Line Alert: the Alert will trigger instantly when price touches the 50% line
