

INDICATORS SETUP

1- First set Lord arrows indicator to the chart

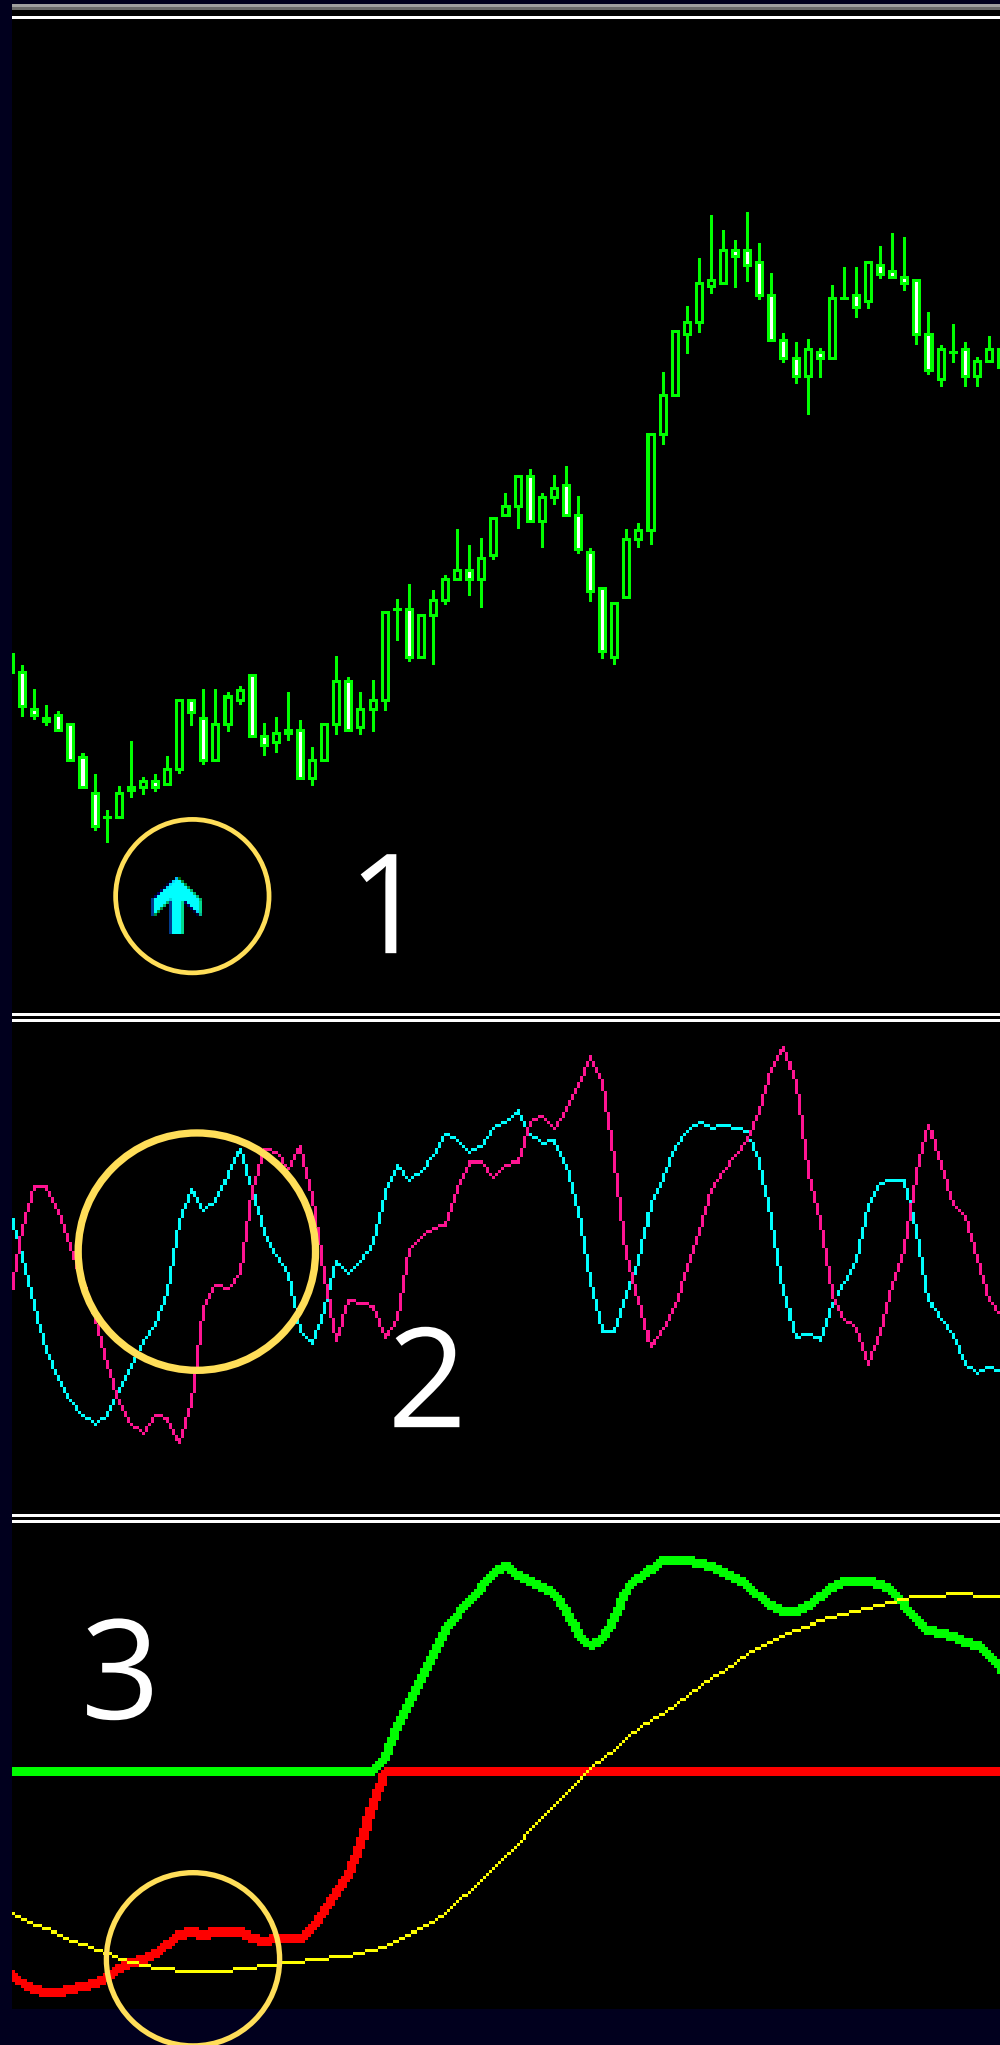

2- Second set Lord A indicator to the chart

3- third set Lord signals indicator to the chart

4- apply Lord MT4 template to the chart

- use trend or rang indicator between to avoid ranging markets

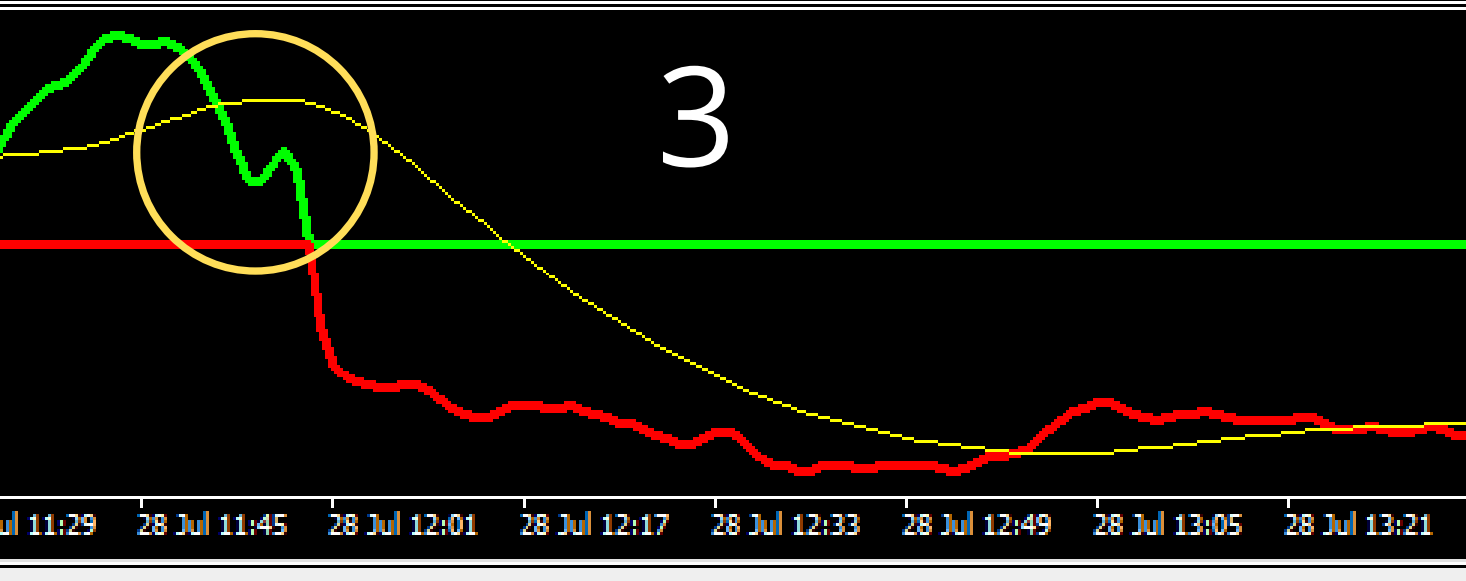

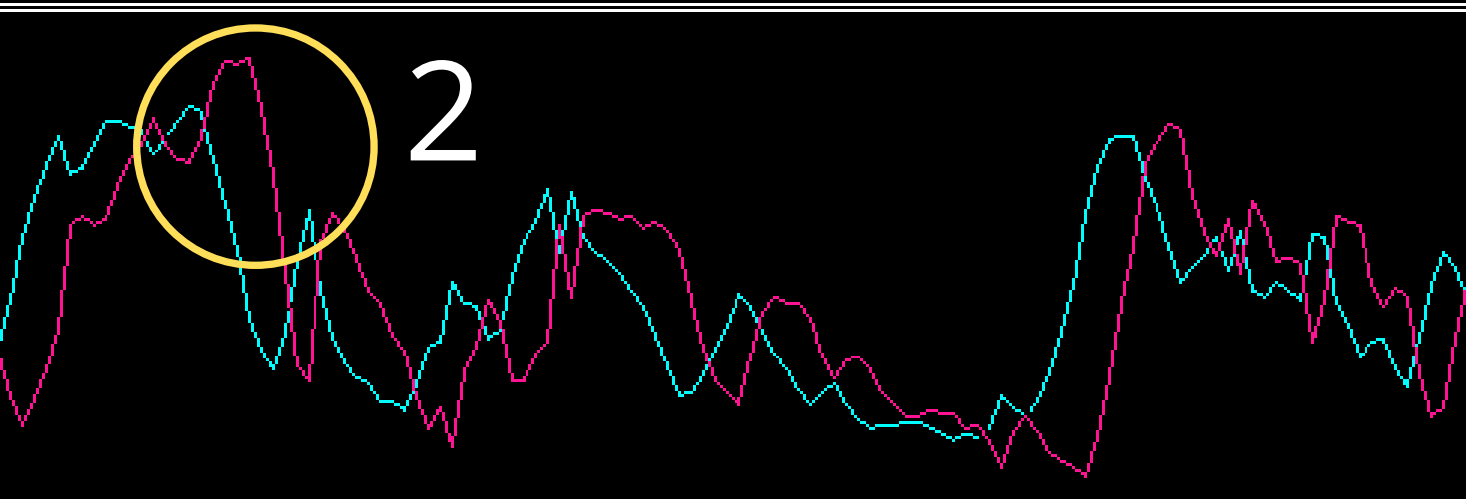

BUY SIGNALS

1- First Lord Arrow should appear in blue color

2- Lord A indicator's blue line should be up the pink line

3- Lord Signals indicator's red line should be up to the yellow line

SELL SIGNALS

1- First Lord Arrow should appear in pink color

2- Lord A indicator's blue line should be down the pink line

3- Lord Signals indicator's green line should be down to the yellow line

- you should use (**trend or range**) indicator to see the market if its trending or ranging

- look at **5 min adx** on the indicator window if its **red** it means down trending and if its **green** it means up trending

- and when it says ranging avoid trading

- you should avoid ranging markets because it gives false signals
