

Another refinement option

I'm am a trend trader as well and can't seem to get away from short-term times frames, so this methodology has also peaked my interest.

I've been experimenting with the Snake Eye Method that Akuma99 introduced a while ago which implements the 10-8 HiLo strategy on the 5 min chart. I've replace the 10 EMA with the 10 EMA High and 8 EMA Low.

Setup is close in the 10-8 HiLo channell and trigger is next close outside of the channel that is with the trend.

All other MAs and angle requirements are the same.

Here is a pic. .
