

**Step 1:** The first thing we need to do is open an account with a Binary Options Trading broker, we recommend using [THIS BROKER](#) for best results.

The screenshot shows the traderXP website interface. At the top, there's a navigation bar with links: TRADE NOW, Binary Option, Banking, Asset Index, Market Review, Guided Tour, Expiry Rates, Live Assistance, and Contact Us. A login section on the right includes fields for Email and Password, and a 'Forgot Password' link. Below the navigation bar, a banner features the text 'Open an account here' in large red letters. To the left of this banner, it says 'A QUICK AND SIMPLE WAY TO ENTER THE WORLD OF ONLINE TRADING' followed by three bullet points: 'Breaking market news straight to your inbox', 'Trade 24/7 with One Touch Options', and 'Flexible trades with Rollover and Double-Up tools'. In the center, there's a graphic showing a trading interface with a line chart and various indicators. To the right, a 'START TRADING NOW' form is visible, containing fields for First Name, Last Name, Country (a dropdown menu), Email, and My Phone. There's also a checkbox for 'I'd like to speak with a trading coach' and a large orange 'OPEN ACCOUNT' button. At the bottom of the banner, there are three numbered steps (1, 2, 3) and an 'Open Account' button.

**Step 2:** Now you need to download, unzip and install the Binary Options Magnet software.

**Step 3:** Once you have unzipped your software and run the .exe file you will see the licensing screen below you need to add your licence in the input area, your licence is below:

**Your Licence Key:** 40c4df236cda67e1f24023bec092ed6e

**Step 4:** You should now see the following software as in the picture below, this is my Binary Options Magnet Advanced software!

There is a dropdown list at the top of the software where you can select which pair you want to trade, we suggest starting with the Eur/Usd pair before moving onto others, the '5 minute' timeframe cannot be changed, that is the timeframe the system runs from as it takes the signals from our servers.

**Step 5:** Implementing the software with the binary options trading platform.

There are a number of rules you need to follow before you place a trade.

1. Make sure you have your binary options brokers trading window open and set to 'currencies'

**Set To Eur/Usd and make sure there is less than 15 minutes left until the option runs out**

4. Once you have found an option that has 15 minutes or less remaining you now need to turn your attention to the software and the 'criteria' points, you now need to wait until they all have a tick next to them and once this happens look at the signal (either Buy/Call or Sell/Put)

The screenshot shows a trading interface with a dark blue background. At the top, there is a dropdown menu set to 'Eur/Usd' and a light blue button labeled '5 Minute'. Below these are four criteria boxes: 'CRITERIA 1 MET' with a green checkmark, 'CRITERIA 2 MET' with a red 'X', 'CRITERIA 3 MET' with a red 'X', and 'CRITERIA 4 MET' with a red 'X'. At the bottom is a large orange button labeled 'NO TRADE'.

**No Trade!**

The screenshot shows a trading interface with a dark blue background. At the top, there is a dropdown menu set to 'Eur/Usd' and a light blue button labeled '5 Minute'. Below these are four criteria boxes: 'CRITERIA 1 MET' with a green checkmark, 'CRITERIA 2 MET' with a green checkmark, 'CRITERIA 3 MET' with a green checkmark, and 'CRITERIA 4 MET' with a green checkmark. At the bottom is a large orange button labeled 'CALL'.

**Buy Trade!**

5. Once this criteria is met it's time to place your trade, simply click either Put or Call and enter the amount you want to trade.

**Enter the amount you wish to trade here**

6. Now you have placed your trade it's just time to wait until the option expires and you can collect your money.
