

PHOENIX SYSTEM V 1.0

[© Trackerforex.com](http://Trackerforex.com)

**** Please follow these instructions step by step to set up your system ****

If some of what I have written is redundant then that is only because it is that important to be said more than once as I do want you to succeed in your Forex trading. A few years of sleep for yourself for the lack of my own is what you have purchased, not a magic green light that will make you millions in the next six months.

No matter where you are now in your trading experience, I do believe that all of this information will only add a great positive to that experience as long as you take your time and treat trading like a business and not a hobby.

~ WITH THAT SAID....LETS GET STARTED ON THAT EXPERIENCE ~

1) Start by downloading the MT4 trading platform from your favorit broker that is inside the main folder If you have not used MT4 before or just want want a clean install of MT4. There will be a live update run on the software once it is downloaded.

Minimize the window for **these instructions**. Download the MT4 and refer back to these instructions as you set it all up.

**** I AM ABLE TO ANSWER MOST ALL QUESTIONS BUT YOU CAN ALSO REFER TO THE METAQUOTES SITE FROM THE MT4 TOOLBAR "HELP" BOX FOR ANY TECHNICAL QUESTIONS THAT RELATE TO THE MT4 PLATFORM ITSELF. ****

You are able to download the MT4 Demo version to trade with virtual money. You can use any brokers trading platform that you want for live trading, using your MT4 chart system/set up, to determine your actual live trades. Having multiple monitor set ups is helpfull but not totally nessasary. The MT4 set up will ask you when first installed, for information including an email address. None of the information is collected for any reason other than to set up the software. You can use any name you want, but a real email address is required to set up the MT4.

2) Install the indicator and template you've downloaded for those of you who do not know how please see the following video tutorial

http://www.youtube.com/watch?v=OKOv_mngzd0

or you must read the readme file,that included on your download packet

**** OK,NOW YOU HAVE YOUR SYSTEM ALL SET UP AND READY TO USE ****

after you install the template and indicator your mt4 chart will look like this

As you can see, appearance of many contained icon in the chart in the indicator,what is it?

This indicator is designed to recognize the candlestick patterns, meaning the emergence of a star icon is because candlestick pattern has formed and the price will almost certainly turn (reverse).

With the combination of other tools that make this system powerful.

This indicator named **RED STAR** will appear when the candlestick pattern has formed and the price reaches a overbought (saturation point) , is shown above and demonstrate that there will be a long bearish trend (bearish trend will start)

This indicator named **GREEN STAR** will appear when the candlestick pattern has formed and the price reaches a oversold (saturation point) , is shown below and demonstrate that there will be a long bullish trend trend (bearish has ended and will be replaced with a bullish trend)

This indicator will appear when the candlestick pattern has formed and the price reaches a saturation point, when they appear at the bottom means prices will rise and when they appear at the top means that the price will come down with a moderate amount, usually between 15-30 pips or more.

This indicator will appear when the candlestick pattern has formed and the price reaches a saturation point, when they appear at the bottom means prices will rise and when they appear at the top means that the price will come down with a moderate amount, usually between 10-15 pips or more.

Current trend EMA

The current trend EMA is a EMA (exponential moving average) collection that follows the the candlestick flow over time and the trend will be seen by naked eye, the position of current trend EMA is always under "the frontier" when a bearish trend and is above the "the frontier " when a bullish trend.

The frontier EMA

THE frontier EMA is a EMA (exponential moving average) collection that follows the the candlestick flow over time , the function of 'the frontier' is to ensure "current trend" remains at the prevailing trend, it assures us that the trend will not change and we should keep the position.

we must be vigilant when the current trend of EMA has touched even passed the frontier EMA, but we need to consider closing the position by looking at whether the **green** or **red star** icon has appeared, an icon of green or red star has appeared in the closed position required in order to avoid floating.

Trading rule system

Basic trading flow should use whatever time frame depending on your taste, if your character is scalper trader can use a TIME FRAME 5 or 15, but to reduce the false signal in the H1 TIME FRAME suggest to use, according to the experience of using this indicator TF H1 is the best, This system can be applied across all currency pairs.

See the screenshot below for detail :

This trading system can be used for long term or scalping mode, two options depending on your trading habits and convenience.

explanation based on the image above is how to implement longterm trading or scalping mode using this system is :

HOW USE THIS SYSTEM FOR LONG TERM TRADE (ALSO CALLED SWING TRADER) :

For this trade mode **the big red** or **green star** is a sign that there will be a long trend, as explained above, when the **big red star** appears then we are ready to open sell and we will close the position when the **green star** appeared,

corroborated by the invisibility of current trend EMA and the frontier EMA have converged and intersected.

for example, would like the picture below:

HOW USE THIS SYSTEM FOR LONG TERM TRADE :

BEFORE WE LEARN THE TECHNIQUE OF SCALPING IT'S GOOD THAT WE SHOULD KNOW WHAT SCALPING?

Forex scalping is a popular method involving the quick opening and liquidation of positions. The term “quick” is imprecise, repeatedly taking small pips in a short time, This technique is suitable for you who want to take a lot of pips every time the price volatile and do not want to lose the moment.

A scalper needs to continue to sit at the computer and they should be able to "enjoy" the stress caused by movement of the chart. A scalper needs to concentrate on observing the slightest movement of the chart. It takes a mentally strong and quick reactions in order to be able to open and close positions when the trade is made to move as desired, or the opposite.

WELL, HOW USE THIS SYSTEM FOR LONG TERM TRADE ?

In scalping mode using this system is called “ EXTREME SCALPING” , you must be a brave !! 😊

OPEN POSITION: open position in the candle right after the star icon and close it up right when the next star icon appears **does not matter the color of the star**, it is repeatedly.

FOR EXAMPLE : Red star icon has appeared that means ready to open a position on the candle after a red star icon, after 2 hours later the yellow star appears, then when it's time to close position.

“ you can close when gets a few pips profit, no need to wait for a close signal appears ”

STOP LOSS: talking about the **stop loss**,for myself not use a stop loss on my trades in this system, but if you have any reason to apply a stop loss, follow these instructions below.

Real trading example, would like the picture below :

look at the accuracy!! (99.9%) my friends .. 😊

RULES TO LIVE BY :

- ✓ Never overtrade by using a very large lot, For the money \$ 10,000 you can use 2 standard lots, but to \$ 5,000 down, you may only use a maximum of 1 lot.
- ✓ Always trade on the currency pair that has the lowest spread. it is to maximize profit and minimize risk for a big loss.
- ✓ Don't be trading in when the market is sideways, when the sideways market movement of the price will move up and down with a relatively small scale, trading at the time it takes focus and dexterity, not recommended for beginners.
- ✓ although we can still trade using this system well, but look at the fundamental news is still deemed necessary, however, the fundamental news is the analysis window or a complement, because we know the price movements may suddenly move significantly due to fundamental news, always a time to see the fundamental news on this website:

[HTTP://WWW.FOREXFACTORY.COM](http://www.forexfactory.com)

[HTTP://WWW.BLOOMBERG.COM](http://www.bloomberg.com)

"ALERT ONLY THE MOST IMPORTANT NEWS ON THE CURRENCY PAIR TO TRADE"

This is very important :

- **YOU MUST START WITH AN EXERCISE IN DEMO ACCOUNT, DO NOT PUSH FOR REAL TRADING IF IT HAS NOT BEEN ABLE TO UNDERSTAND THIS SYSTEM, THE SYSTEM IS VERY EASY GOING BUT EACH SYSTEM USES A DIFFERENT UNDERSTANDING, THEN YOU SHOULD REALLY ADAPT THIS SYSTEM FIRST.**
- **RUN THE SYSTEM CONSISTENTLY !**

Thank's for your purchase

PHOENIX SYSTEM V 1.0

Enjoy the system and happy profit 😊

Regard,

Harry pertnad
