

GAP ASSASSINS

I have tried this technique in a long time, and has a lot of money for me. The ways that I share this all ,is the result of my own research AND DID IT!

There are two websites that I use for the analysis:

1. Forex Factory (www.forexfactory.com)

This is the main website that I use in playing the gap, the This website I just saw the news box next to the red Just the High Volatility which means this story into the limelight for traders in the forex market, so has the price movement very large and significant. As shown below:

2. FXSTREET.COM

I use this website only as a complement to the news where the news important in the Forex Factory is also considered important by traders who there so that the website also has an important sign as well.Like the example shown below:

LEARN HOW COMMODITY PRICES AFFECT CURRENCY RATES

There are some news in the forex factory is very important and in Fxstreet also, but there is also news on Forex Factory is absolutely crucial, but in Fxstreet Only has 2 exclamation mark, it's not a problem and also fixed considered important.

This is a record of important news of each country is usually the case a GAP:

1. Amerika Serikat (USD)

- Nonfarm Payroll
- Unemployment Rate
- US Consumer Confidence
- Unemployment Claims
- ADP Nonfarm Unemployment
- Interest rate
- ISM Manufacturing Index
- ISM Non Manufacturing Index
- Core CPI
- Trade Balance
- Revised GDP

2. Euro (EUR)

- ECB Press Conference
- German Ifo Business Climate

3. Inggris (GBP)

- MPC Treasury Committee Hearings
- Services PMI
- MPC Meeting Minutes
- Revised GDP
- BOE Inflation Report

4. Australia (AUD)

- RBA Interest Rate
- Retail Sales
- WMI Consumer Sentiment
- Unemployment Rate
- Unemployment Change
- Private New Capital Expenditure

5. New Zealand (NZD)

- RBNZ Interest Rate
- Unemployment Rate
- Unemployment Change
- GDP

6. Canada (CAD)

- Core CPI
- Core Retail Sales
- Housing Starts
- Unemployment Rate
- Unemployment Change
- Trade Balance
- GDP
- Interest Rate

7. Swiss (CHF)

- Interest Rate

For currency Japan (JPY) to date I have never found Gap occurs because the news of the two currencies are directly influential in the Forex Market.

Rules to Live By:

1. Money Management.

Never overtrade by using a very large lot. For the money \$ 10,000 you can use 2 standard lots, but to \$ 5,000 down, you may only use a maximum of 1 lot. it is prevented if in case you lose in a gap, you can still playing in the next Gap.

2. Control Your Emotions / your trading Psychology.

- Fear

Do not panic when you see the account minus the number of pretty much, because maybe your account within a few minutes will directly profit, but it could not happen if you have already panicked and closed the account in a state of loss.

- Greedy

Do not be Greedy people, do not set a target profit too high, because it is very likely you lost profit because the market return opposite direction to the direction that you expect and you are profit should have become lost profits and even losses.

3. Do not Ever Go to Market When the gap is already happening and has been run too many points (pips).

What often happens is you go when the gap was too far away, so you go on the end of Bar Chart that has been formed and Bar The chart behind the direction.

4. Always Use the Volume Indicator and Time Frame 15 minutes.

5. Always Check the Volume.

What should you do before entering the market than to see the news will release the volume enters the market. Gap can only be occurs when the volume of people coming into the market very much. On time frame 15 minutes, you can see the last volume of existing 15 minutes time frame before market release, when the green or increased 95% will there be a gap. 5% chance of not happening Gap if 15 minutes before the news release was a lot of volume that enter and move the market, and even make first GAP. Not all the important news will always be a gap of every month.

6. Always look at Motion Bar Chart another currency (correlation)

Other currencies what I mean here is a currency that has correlation with the currency you tradingkan, for example you are trading EUR / USD, you should also see a bar chart of USD / CHF, this is to facilitate you in making decisions, because if they move together, means that the market is being paraded towards the, follow along with the market.

7. Do not question the direction Gap.

If bad news comes out about a country, not necessarily going to gap down, and vice versa. In the event of Gap, never questioned or searched for answers as to why the market direction kesana. Yang you have to do is move quickly in making decisions, because only a few minutes late, you've lost opportunity.

8. Do not Ever Go to Market Before the news was announced / released.

Because the Market is moving very fast or volatile before the news release. Remember, all you do is FOLLOW the market direction, rather than Guessing the Market.

9. Always play on pair currency that has the lowest spread. This is to maximize profit and minimize risk for a big loss.

You Must Remember When You Lose, There's always that opportunity for you, So Do not ever give up and not be afraid to go to the Market again and play the GAP.

How to trade ?

Put **buy stop** and **sell stop** 10-15 pips above current price at 5 minute before news realease with 15 – 20 pips stop loss, then wait and see.. 😊

Once again..Always use correlation with other currency pair to enter the market.

FOR EXAMPLE :

If the news release is From United States, i will open the currency pair that have near correlation with EUR/USD, they are USD/CHF and GBP/USD in the same time.

If USD bearish, The USD/CHF chart will go DOWN and the EUR/USD chart will be go UP. Same like GBP/USD, I always use GBP/USD for Confirmation that the Trend Is very Strong.

If I see The USD BULLISH at 3 currency pairs above (USD/CHF, EUR/USD, GBP/USD) At the same time and the trend Is strong, I will Sell EUR/USD.

THIS TECHNIQUE APPLIES TO IMPORTANT NEWS MENTIONED ABOVE !!

GOOD LUCK ☺
