

# Forex 5 Stars

## User's Guide

by Rita Lasker

2012

[www.forex5stars.com](http://www.forex5stars.com)

## Introduction

I am Rita Lasker, the head of Green Forex Group with my team of programmers and professional currency market traders.

Today I am proud to present you our new brilliant product - **Forex 5 Stars**.

We worked on Forex 5 Stars' idea more than 18 months. It is the result of hard work of our lead programmers in cooperation with mathematicians from Israel and Russia.

The task we wanted to accomplish was simple but not that easy in realization. And this challenge was initially set by you, our dear members, and its main idea was:

### **To develop the system that will**

- **Catch the trend most precisely**
- **Define the best moments to open and close orders**
- **Be at most user-friendly, send the signals of all possible types**
- **Work with any currency pair**

Forex 5 Stars development was conducted by two teams of programmers. The constant competition and ideas exchange gave the desirable synergistic effect and in late November 2011 we finally began testing the system.

In December third-parties' traders were invited to test Forex 5 Stars and we received a lot of positive comments from them. Almost unanimously they noted that system catches the trend with unbelievable accuracy and that it has a great false signals filtration during flat market. Apart from it, they marked that it is extremely easy in operation and called it "trader-friendly".

We recommend this system to all traders who value stability and precise analysis.

Forex 5 Stars is the system for middle-term and long-term types of trading. It provides you with high-quality signals that are sufficient for taking the right decisions in Forex trading.

**Yours,**

**Rita Lasker & Green Forex Group.**

### **Indicator. Robot. Informer**

Informer is a middle branch between an Indicator and a Robot. This is a more complex model of an indicator that not only evaluates current market situation but also runs a comparative analysis based on historic data.

Informer comprises the best qualities of the robots and indicators.

Forex 5 Stars is the program that runs according to a specified strategic algorithm. During its operation it utilizes a few indicators. It provides a trader with all necessary statistical facts. It informs trader by different types of notifications such as audio and text alerts, electronic emails.

Forex 5 Stars algorithm utilizes 6 redesigned and 8 newly developed exclusive proprietary indicators. The information is not provided to a trader in the form of a graphics 'pile', but in an easy-to-read text format.

## How Forex 5 Stars Works

Forex 5 Stars sends signals to a trader.

There are different types of notifications such as: Sound, Arrows in a chart, Alerts and emails.

We tried our best to come up with all possible kinds of notifications, so that you could get them no matter what.

Forex 5 Stars sends signals in the following cases:

1. When an order needs to be opened
2. When it's necessary to change Stop Loss
3. When the order needs to be closed (if it wasn't closed earlier on Stop Loss)

### Let's look closer at 3 types of signals

When you place Forex 5 Stars in a chart of any currency pair, it immediately starts to search for a trend.

The main goal of Forex 5 Stars is to find an ideal moment for opening an order.

When such a moment has been found, you receive your first signal:

#### Open Order

A trader, having received a signal, opens an order.

Forex 5 Stars begins searching and following a trend.

There may be any kind of situation on the market, so in order not to take losses when the situation becomes not overly favorable, we ALWAYS recommend to use Stop Loss. The level of Stop Loss will be conveyed to you by Forex 5 Stars in the Open Order alert.

\* Forex 5 Stars doesn't use Take Profit. It's simply impossible to predict just how long the trend would last and how powerful it is going to be. When the trend is powerful, the order may close on Take Profit prematurely and the trader won't take the entire potential profit.

If all Forex 5 Stars' calculations are correct, it doesn't make sense to keep Stop Loss in one place. The most logical decision is to move Stop Loss following the price. It may look like a Trailing Stop, but the built-in algorithms in the Forex 5 Stars are much more intelligent than that.

#### Modify Order

This signal conveys a new Stop Loss level.

#### Very Important!!!

Stop Loss is necessary for prevention and protection from a sudden reversal.

We take a great care in making sure that our members earn as much money as they can and while doing so, lose as little as they possibly can.

That is why Forex 5 Stars will be sending you signals at the beginning of every candle. Please don't neglect the Stop Loss. After all, we'd like to make sure you are well protected from the unexpected Forex surprises.

If you trade on **H1 timeframe**, the Stop Loss modification signals will be arriving once every hour (at the beginning of the next hourly candle).

If you trade on **H4 timeframe**, the Stop Loss modification signals will be arriving once every 4 hours (at the beginning of the next 4-hour candle).

If you trade on **D1 timeframe**, the Stop Loss modification signals will be arriving once a day (at the beginning of the next daily candle).

The moment Forex 5 Stars defines the end of a trend, it sends you the third type of the signal:

### **Close Order**

Having received this signal, please close the order.

In certain cases the order can be closed on Stop Loss.

## **What to do if you missed the signal**

In the event that you missed the signal or are located away from your computer when the signal arrives, don't worry, **NOTHING TERRIBLE HAS HAPPENED!**

Forex 5 Stars is specifically tuned to reveal major trends that usually last for more than **5 hours**. Once you find yourself again in front of the computer after you had missed the signal, assess the situation.

If you see that the trend is relatively smooth, you can safely open an order. However, if you see that within the past half an hour to an hour the price moved about **80-100 pips**, it's quite possible that the trend is affected by the news and will run its course quite soon.

In this situation we don't advise that you open an order. Instead, simply **wait for the next signal**. **Greed is the worst adviser on Forex.**

And just to be absolutely sure that you never miss a signal, we highly recommend that you pay close attention to your cell phone. In the overwhelming majority of the modern phones there's **a built-in mail client**.

Set it up and you'll be able to get signals no matter where you happen to be. The only thing you'd need to do after that is to get to your computer as soon as possible and follow the instructions Forex 5 Stars had sent you.

## Installation and Setup

Forex 5 Stars Informer is a plug-in that requires **MetaTrader 4** to function.

If you already have MetaTrader 4 installed, please check what your build of MetaTrader platform is.

It is extremely important to update the trading platform often. If you run the previous versions of MT4 you may experience problems with software installation. Please contact your broker support to learn about the latest available build. At the moment the most actual build we use is 409 (depends on the broker), to check your build please open the menu **Help/About...**

The following message will appear:

Please note that each broker has its unique name in the left upper part of the window message, the build is mentioned there below.

If you already have the latest build of MetaTrader 4, place the following file:

### **forex5stars.ex4**

into **C:/Program Files/xxxxx/experts/**, where **xxxxx** is the name of your MT4.

**For example**, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete path will look like this: **C:/Program Files/FxPro - MetaTrader/experts**.

Relaunch MetaTrader 4 and skip to **Step 3** below.

If you do not have MetaTrader 4 installed, you need to download it from a Forex broker web site. We recommend using only well known, reputable brokers that have been on the mark for a long time, such as:

FxPro <http://fxpro.com>

Alpari UK <http://alpari.co.uk>

FXDD <http://fxdd.com>

### **Step 1**

Follow the links above, choose your Forex broker, and download MetaTrader 4 for free.

After you download MetaTrader 4, install it on your computer. This is a standard and simple operation.

## Step 2

After the installation of MetaTrader 4, place the following file:

**forex5stars.ex4**

into **C:/Program Files/xxxxx/experts**, where **xxxxx** is the name of your MT4.

**For example**, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete path will look like this: **C:/Program Files/FxPro - MetaTrader/experts**.

## Step 3

(if you have your own demo or your own real account already, skip Step3)

Launch MetaTrader 4 by selecting it from the **Start** menu.

MetaTrader platform of different brokers may create the unique folders while installation. If you can't find MetaTrader icon in the Start menu or on your desktop, please look more closely as it may be in the new created folder with your broker's name like in the given example:

When the application launches, it presents a window in which you need to enter your demo account details.

**Fill out all the fields carefully.**

Selecting the "I agree to subscribe to your newsletters" checkbox makes the OK button available. Once you have filled out all the fields, click OK.

**Personal details**  
 To open an account, please fill out all the following fields:

Name:  min 6 chars

Country:

State:  min 2 chars

City:  min 2 chars

Zip code:  min 3 chars

Address:  min 6 chars

Phone:  min 6 chars

Email:  name@company.com

Account Type:  forex

Currency:  USD

Leverage:  1:100

Deposit:  5000

☐ I agree to subscribe to your newsletters

When you click OK, your demo account will be registered and you will be signed in with your details.

Your account number is displayed on the left of the window title. If you see it there, it indicates that your account has been registered successfully and you have logged in the system.

#### Step 4

Take a look at the Navigator panel on the left of the main window.

The Navigator panel displays all the accounts, indicators, expert advisors, custom indicators, and scripts available to you. Let's focus on Expert Advisors for now.

If you followed the simple instruction above, you should see **forex5stars** under Expert Advisors.

If you don't see it there, please make sure you have placed the file **forex5stars.ex4** in the correct folder, as described above.

**Relaunch** MetaTrader 4 and check Expert Advisors again. If **forex5stars** is still not listed there, contact our technical support by sending an email to: **support@ritalasker.com**

### Step 5

Please open a chart of **ANY currency pair**. Choose the timeframe you like - **H1** timeframe or **H4** timeframe or **D1** timeframe.

Drag and drop **forex5stars** from the Navigator panel to the chart.

A window with the Informer settings appears.

Please, make all the settings in the **"Common"** tab the same as in the picture below.

In the “Inputs” tab you can set up the following parameters:

**Alert** – signals in Alert window

**Email** – signals that you get at your email address

**Attention!** The settings of the Informer allow you just to activate/deactivate Email notifications function itself. Though, if you don't set up your MetaTrader correctly in the menu Tools - Options - Email, the signals won't reach your email anyway.

How to set up Email notification correctly is described in the **E-mail notification settings** section.

Click **OK**

## Step 6

In the top right-hand corner of the terminal window you should see the name of the Informer with a cross next to it. This indicates that the Informer has been activated but your terminal still keeps it from functioning.

To make it work, find and click the button Expert Advisors in your Toolbar. If your tab is green, it means you have enabled Expert Advisors.

Once you click Expert Advisor (the tab is green), a smiley face will appear next to the informer name instead of the cross.

Great. You have successfully installed, set up, and launched the Informer.

### **Important!**

After installing the Informer on your chart you won't see anything except its name and a smiley face in the top right-hand corner at first.

You won't see any graphical signals in the past. Please do not worry. The Informer is not an Indicator, and it provides only actual real-time signals. Please just be patient. After some time passes (maybe 1-2 days) you will get a signal to open an order.

After this please act according to the Informer's signals.

### **Email notification settings**

To make you never miss a single signal even being away from your computer we inbuilt the function of Email alerts into our Forex 5 Stars.

This is a function of high demand, especially taking into account that Forex 5 Stars is an Informer for middle-term and long-term trading.

After getting an email alert you might be able to reach your computer and open/close an Order. Though to make Email alerts be sent from your MetaTrader, you need to set it up correctly.

Open the menu **Tools - Options**

and choose the tab **Email** in the popped-up window.

Email alerts can be tricky to set up but it's the most valuable and useful tool.

To start, it's important to know that the platform itself doesn't have the ability to send messages. It needs to log in to an email account to be able to send emails. This service is called **SMTP**.

Unfortunately free email services like Google, Hyahoo and Hotmail will not work as they use SSL protocol that is not supported by MetaTrader4.

Thus, there are 2 methods to receive Email notifications:

- Using the email, provided by your ISP (Internet service provider)
- Using other SMTP resources like SMTP2Go

### **Method №1 is ISP SMTP**

Internet service providers usually give an email address to their customers, and these email addresses typically offer SMTP service.

In your platform go to **Tools - Options** and select the **Email** tab from the top.

The 'Options' dialog box has a blue title bar with a question mark and a close button. Below the title bar is a tabbed interface with tabs for 'Server', 'Charts', 'Objects', 'Trade', 'Expert Advisors', 'Email' (selected), 'Publisher', and 'Events'. The 'Email' tab contains the following settings:

- ☒ Enable
- SMTP server:
- SMTP login:
- SMTP password:
- From:
- To:
- 

We'll see there boxes to enter your e-mail account information with examples in red. If you don't know what the SMTP server address is, contact your ISP (Internet service provider) customer service, and they'll tell you.

This is the same 'Options' dialog box as above, but with a red underline under the 'SMTP server' label.

- ☒ Enable
- SMTP server:
- SMTP login:
- SMTP password:
- From:
- To:
- 

The SMTP login and password fields are your e-mail address and the password you use to access it.

**Options**

Server Charts Objects Trade Expert Advisors **Email** Publisher Events

☒ Enable

SMTP server:

SMTP login:

SMTP password:

From:

To:

The '**From**' field is the same as your e-mail address, and the '**To**' field is where you want your email to be sent to.

**Options**

Server Charts Objects Trade Expert Advisors **Email** Publisher Events

☒ Enable

SMTP server:

SMTP login:

SMTP password:

From:

To:

After you fill out all the fields you can test it. Press the **Test** button, and you will get a test message to the address that you wrote in the '**To**' field.

If you didn't get the test message at your email please check your messages in the Journal. And if you find there a message like this one:

Termin

2012.01.24 22:38:30 Mail: error connecting to smtp.gmail.com:587

Trade | Account History | News | Alerts | Mailbox | Experts | Journal

Please contact your ISP (Internet service provider) customer service.

If you got a test message at the specified email address, then the e-mail notifications service is set up correctly and you will be able to get signals from Forex 5 Stars at your email.

## Method №2 - SMTP2Go

Please follow the link [www.smtp2go.com](http://www.smtp2go.com) to register a new account. To evaluate this system it will be enough to choose Free Trial Plan – 10 Emails per day. If you like the way SMTP2GO works, you may later purchase Standard Plan – 50 Emails per day.

When the account registration is completed, you will be provided with SMTP server. In the section above there are described the settings of MetaTrader that you will need to fill out with the information you received from SMTP2GO.

## Signals

If you set up Email notification correctly, Forex 5 Stars will be providing you with the following signals:

### Open Order

If your computer is connected to a speaker (or headphones), you will hear a sound alert from MetaTrader.

At the same time you will see an arrow above or under the current candle pointing out the direction of an Order to be opened on the chart:

Upwards – if the signal is to open **Buy Order**

Downwards – if the signal is to open **Sell Order**

Together with the sound and an arrow you will see an Alert window that will include:

Currency pair, timeframe, Buy or Sell order and Stop Loss level.

At the same moment your MetaTrader will send you an email at the address that you entered in the Email alert settings (if you set up everything correctly).

Please open an Order.

To do this click New Order button that can be found in the Toolbar.

In the opened window please choose the currency pair, enter Stop Loss and open an Order according to the received signal.

The "New Order" dialog box in MetaTrader. The "Symbol" dropdown is set to "GBPUSD, Great Britain Pound vs US Dollar". The "Volume" is set to "0.10". The "Stop Loss" and "Take Profit" fields are both set to "0.00000". The "Comment" field is empty. The "Type" is set to "Instant Execution". Below these fields, the current market prices are displayed as "1.56074 / 1.56102". There are two buttons: "Sell" (highlighted with a red underline) and "Buy" (highlighted with a red underline). At the bottom, there is a checkbox for "Enable maximum deviation from quoted price" which is unchecked, and a "Maximum deviation" field set to "0" pips.

## Modify order

At the beginning of the each next candle you will get signals to modify the Order.

There will appear an Alert window with the following information:  
Currency pair, timeframe and a new Stop Loss level.

At the same moment your MetaTrader will send you an email with the new Stop Loss level.

Please modify the Order.

To do this, please open the Terminal tab pressing the button Terminal in the Toolbar

The Terminal tab will appear at the bottom part of MetaTrader. Pay attention to the **Trade** tab – you can see all your open orders in it.

Choose an Order that you want to modify and right-click on it. Choose Modify or Delete order in the popped-up menu.

Set up a new Stop Loss level in the opened window and click **Modify**:

### Close order

When Forex 5 Stars considers a trend over, you will get the following signals to close an Order:

MetaTrader sound alert

Together with the sound you will see an Alert window that will include:  
Currency pair, timeframe and the Order that must be closed.

At the same moment your MetaTrader will send you an email with the same text at the address you registered in the Email alert settings.

Please close an Order.

To do it, please see the Trade tab and find your Order, right-click on it and choose Close Order in the popped-up menu.

In the appeared window click the yellow **Close** button.

We recommend you to start trading with 1-2 pairs only. You may certainly expand the number of currency pairs after trading with Forex 5 Stars for some time.

**Good luck with your trading!**

If you have any questions, please feel free to ask our support team by sending an Email to: [support@ritalasker.com](mailto:support@ritalasker.com)

We will do our best to help you.

**Yours,  
Rita Lasker & Green Forex Group**
