

Forex SOLOMON

v.2.1

User's Guide

by Rita Lasker

2012

www.forexsolomon.com

Introduction

I proudly introduce to you our NEW unique product - **Forex SOLOMON Robot**.

- **This is the first Robot to utilize a self-training technology.**
- **This is the first Robot to have an intellect similar to a human.**

While developing our new product, we've accomplished and implemented a totally new algorithm – the technology to “analyze and adapt”. We touted it an **“S.T.T.” technology** (self-training technology), which is very similar to artificial intelligence. Undoubtedly, this is a major **breakthrough** in the development area of Forex Expert Advisor.

Our robot continually monitors the market, while accumulating the “knowledge” in the process.

Once a week, (meaning during the first week (including weekend) after robot's activation, robot will analyze the following:

- **All of the activities for the preceding week, (Mon – Fri),**
- **Quotations of each individual broker, whose chart it works with,**
- **All of its winning and losing trades for the past week,**
- **Short-term and long-term trends**
- **All important support and resistance levels**

Based on the analysis of all these activities, robot self-corrects or adjusts its own algorithm. These corrections normally take place once a week. With each passing week, given there were no serious stoppages in the robot's performance, (i.e. loss of power, loss of internet connection or having the robot deactivated), robot will improve both performance and results.

Forex SOLOMON, is just like a Wiseman – it systematically learns from its own actions and consistently gets “wiser”, while accumulating all the wealth of information and “knowledge”.

Yours,

Rita Lasker & Green Forex Group.

Installation and Setup

Forex SOLOMON is a Bundle of plug-ins that requires MetaTrader 4 to function.

If you already have MetaTrader 4 installed, place the following files:

forex_solomon_eurusd_v2_1.ex4
forex_solomon_gbpusd_v2_1.ex4

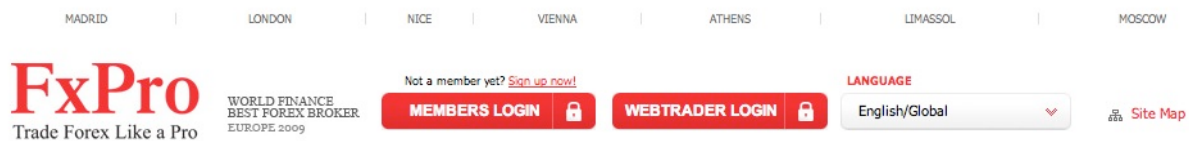

into **C:/Program Files/xxxxx/experts**, where **xxxxx** is the name of your MT4.

For example, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete path will look like this: **C:/Program Files/FxPro - MetaTrader/experts**.

Relaunch MetaTrader 4 and skip to **Step 3** below.

If you do not have MetaTrader 4 installed, you need to download it from a Forex broker web site. We recommend using only well known, reputable brokers that have been on the mark for a long time, such as:

FxPro <http://fxpro.com>

Alpari UK <http://alpari.co.uk>

Step 1

Follow the links above, choose your Forex broker, and download MetaTrader 4 for free.

After you download MetaTrader 4, install it on your computer. This is a standard and simple operation.

Step 2

After the installation of MetaTrader 4, place the following files:

forex_solomon_eurusd_v2_1.ex4
forex_solomon_gbpusd_v2_1.ex4

into **C:/Program Files/xxxxx/experts**, where **xxxxx** is the name of your MT4.

For example, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete path will look like this: **C:/Program Files/FxPro - MetaTrader/experts**.

Step 3

(if you have your own demo or your own real account already, skip Step3)

Launch MetaTrader 4 by selecting it from the Start menu.

When the application launches, it presents a window in which you need to enter your demo account details.

Fill out all the fields carefully.

Selecting the "I agree to subscribe to your newsletters" checkbox makes the OK button available. Once you have filled out all the fields, click OK.

Personal details
To open an account, please fill out all the following fields:

Name: min 6 chars

Country: State: min 2 chars

City: min 2 chars Zip code: min 3 chars

Address: min 6 chars

Phone: min 6 chars Email: name@company.com

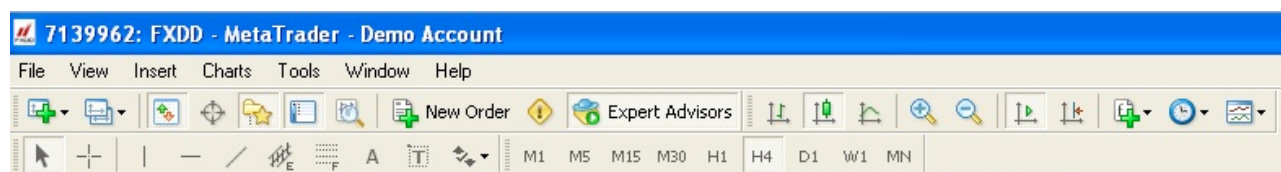

Account Type: forex Currency: USD

Leverage: 1:100 Deposit: 5000

☐ I agree to subscribe to your newsletters

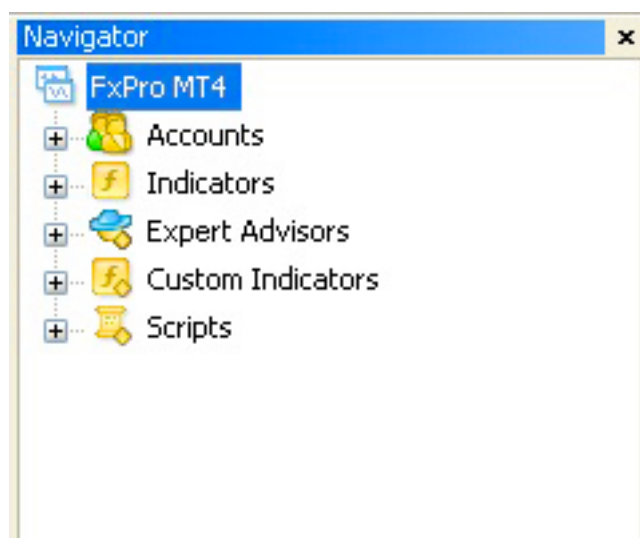

When you click OK, your demo account will be registered and you will be signed in with the system with your demo account details.

Your account number is displayed on the left of the window title. If you see it there, it indicates that your account has been registered successfully and you have logged in the system.

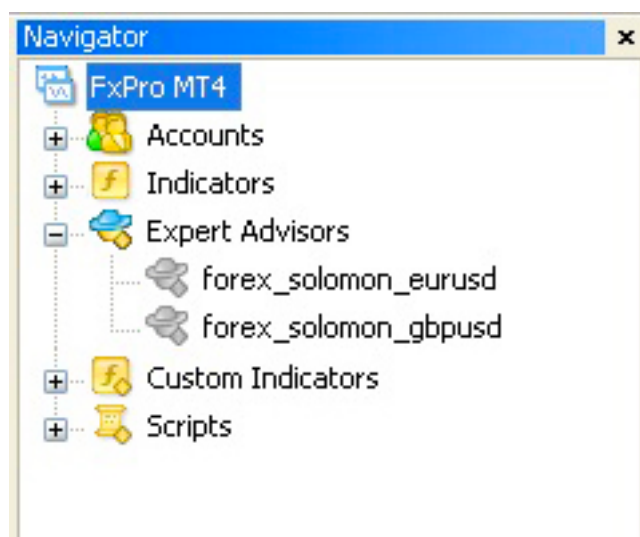

Step 4

Take a look at the Navigator panel on the left of the main window.

The Navigator panel displays all the accounts, indicators, expert advisors, custom indicators, and scripts available to you. Let's focus on Expert Advisors for now.

If you followed the simple instruction above, you should see **forex_solomon_eurusd_v2_1** and **forex_solomon_gbpusd_v2_1** under Expert Advisors.

If you don't see it there, please make sure you have placed the files **forex_solomon_eurusd_v2_1.ex4** and **forex_solomon_gbpusd_v2_1.ex4** in the correct folder, as described above.

Relaunch MetaTrader 4 and check Expert Advisors again. If **forex_solomon_eurusd_v2_1** and **forex_solomon_gbpusd_v2_1** are still not listed there, contact our technical support by sending an email to: **support@ritalasker.com**

Step 5

Open the following charts in MT4:

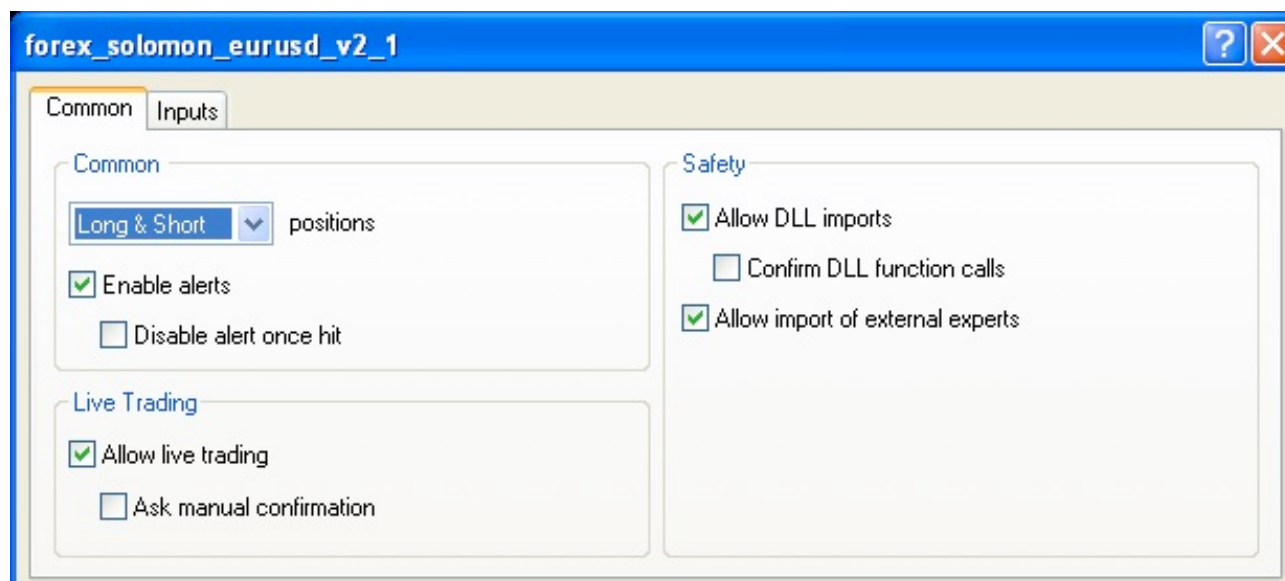

EURUSD H1 for **forex_solomon_eurUSD_v2_1**

GBPUSD H1 for **forex_solomon_gbpUSD_v2_1**

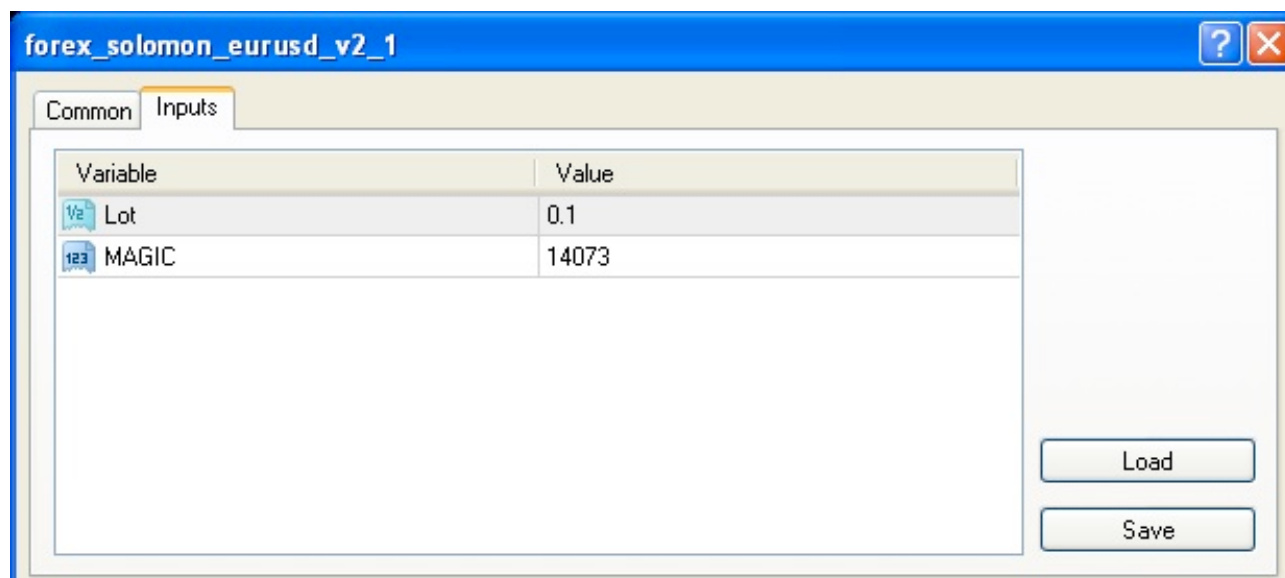

Drag and drop **forex_solomon_eurUSD_v2_1** and **forex_solomon_gbpUSD_v2_1** from the Navigator panel to the charts.

A window with the Robot settings appears.

Please, make all the settings in the **"Common"** tab the same as in the picture below.

In the "Inputs" tab, you'll find the next parameters of the robot:

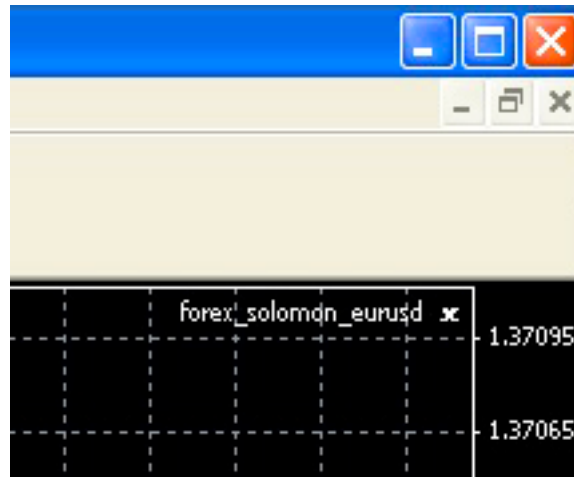

Lot - Initial lot volume

Magic - the unique number of the robot

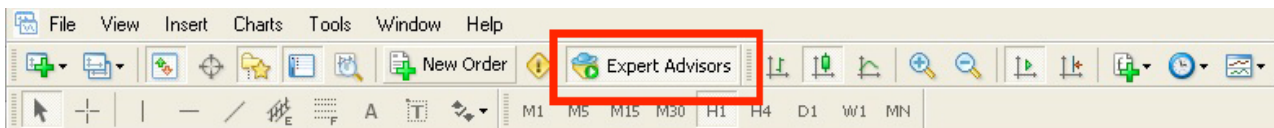

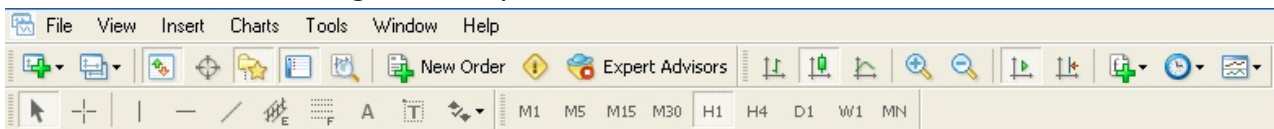

Click **OK**

Step 6

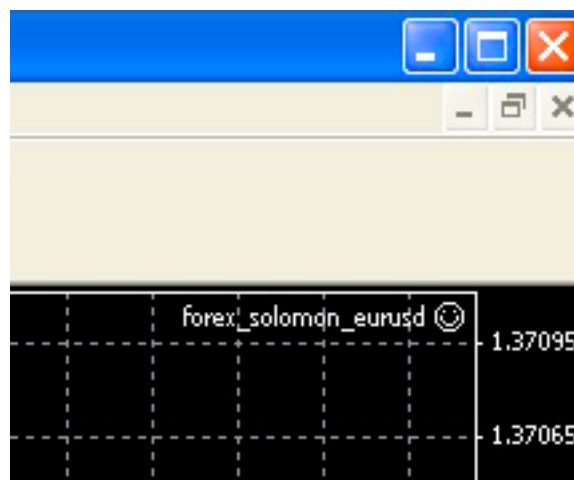

In the top right corner of the terminal window you should see the name of the robot with a cross next to it. This indicates that your robot has been activated but your terminal does not allow algorithmic (robot) trading.

To allow robot trading, click Expert Advisor in the toolbar.

Once you click Expert Advisor, a smiley face will appear next to the robot name, instead of the cross.

Great. You have successfully installed, set up, and launched the robot. Now it will trade, open and close order automatically and completely independently without any

intervention on your part. You can watch the results of its work in the computer screen.

The bottom part of the window displays the trading and their results in two tabs: Trade and Account History.

If you do not see the tabs, press CTRL+T on the keyboard to display the trading window.

We strictly recommend you to activate the "Comments" field in the "Trade" and "Account History". It will help you to define which robot is placing orders now.

Good luck with your trading!

If you have any questions, please feel free to ask our support team by sending an E-mail to: support@ritalasker.com

We will do our best to help you.

**Yours,
Rita Lasker & Green Forex Group.**
