Valuable Pairs | everything, but...All currency pairs are suitable for trading, but It is recommended to trade more volatile pairs, for example pairs with JPY, news | don't miss
If important news comes out and increases the price trend, this favorable conditions to enter the side trend. The indicator will indicate when it is entered.

HOW DOES INDICATOR WORK ?

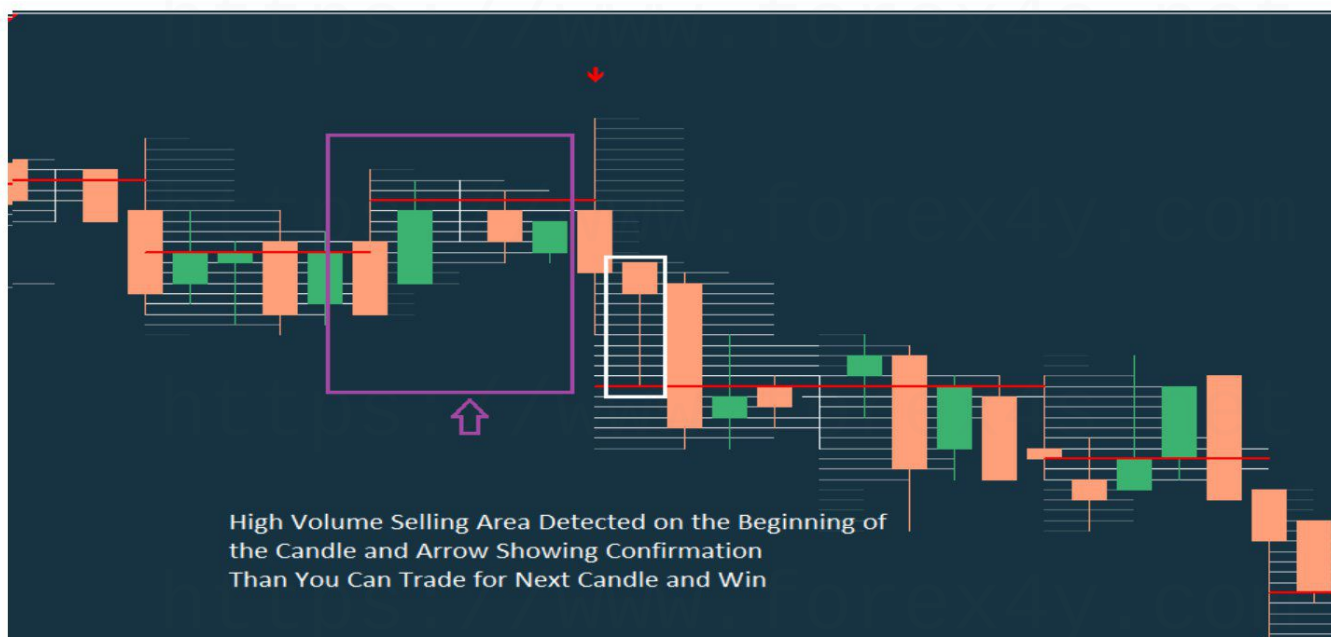

Indicator Magnus PRO in real time, every Second fixes volumes and maps them vertically candles. Thus, you get more information about moving prices. Also the indicator highlights the largest The volume is red in color.

SELL SIGNALS

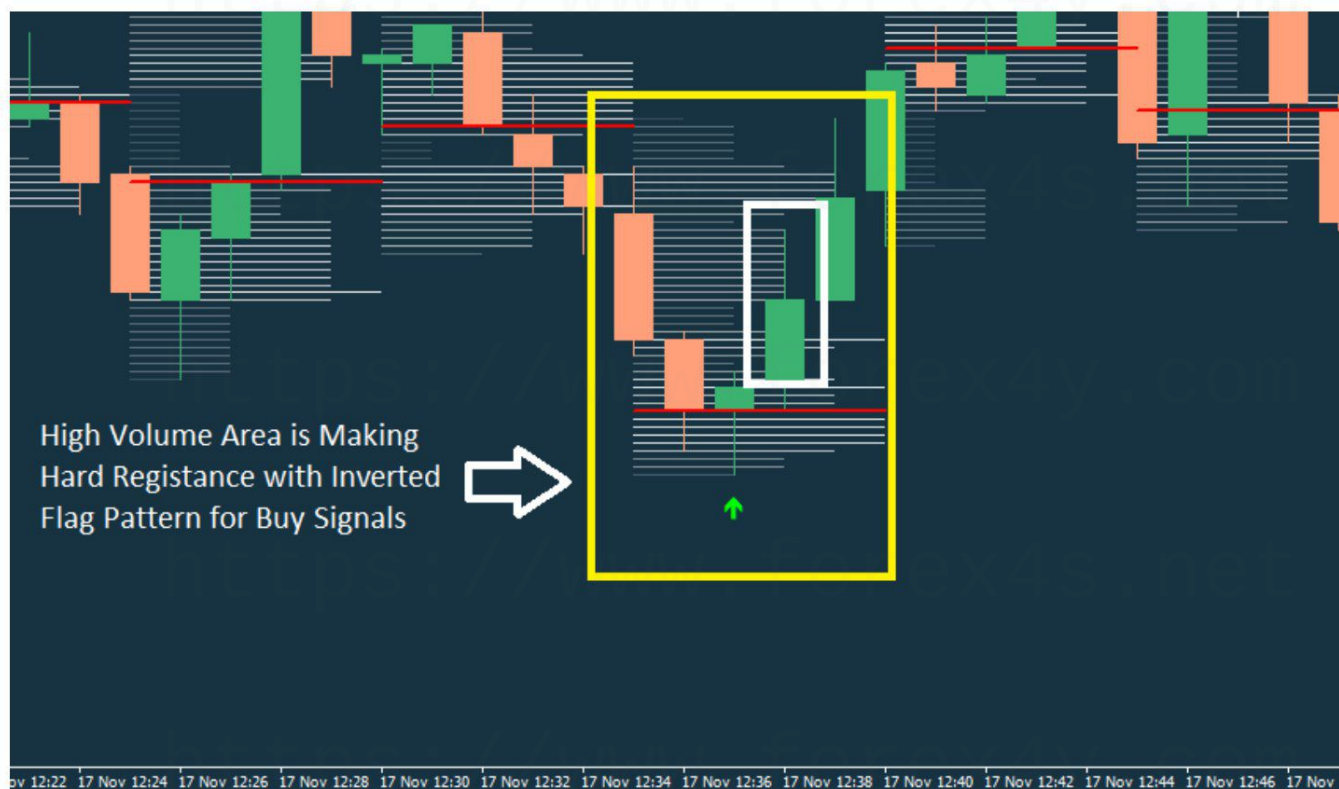

Pay attention to the screenshot,we see SELL signal

Why are there Signals ?

- 1 BEARISH MOVEMENT
- 2 CLUSTER DELTA DETECT SIGNALS FOR THE SELL

BUY SIGNALS

Flag Pattern

Flag Patterns are characterized by their bearish nature, indicative of a high-volume area detected at the top of the chart. When observing such a pattern and noting the Power of Control (POC) represented by the "Red Line," one can confidently identify it as the Flag Pattern.

Inverted Flag Pattern

Inverted Flag Patterns are characterized by their bullish nature, indicative of a high-volume area detected at the Bottom of the chart. When observing such a pattern and noting the Power of Control (POC) represented by the "Red Line," one can confidently identify it as the Inverted Flag Pattern.
