How Your Hermes Council Works

In the 4 articles from MQL5, the AI hedge fund operates in **three continuous phases**:

1. **Phase I (10 Specialized Analysts)**: In parallel, each agent evaluates a single discipline (Macro, Technicals, Volatility/Options, Order Book Depth, Microstructure, Sentiment, Central Bank Rates, Asian Session, London Session, New York Session).
2. **Phase II (4 Risk Gates)**: 4 risk agents (Capital Allocation, News Blackout, Rollover/Spread, Maximum Drawdown) audit the proposals.
3. **Phase III (The Chairman)**: Evaluates the weighted analyst ballot, verifies risk gates, and synthesizes the final operational verdict (**Action**, **Entry**, **Stop Loss**, and **Take Profit**).

The Council's deliberation engine has been connected to live M15 market data for your 4 chosen instruments: **GBPUSD**, **EURUSD**, **USDJPY**, and **GOLD** (XAUUSD).

How to Ask The Chairman (In App)

You talk to him **by typing directly in the application**:

1. **Locate The Chairman**:
   - In `ForexStation.exe`, walk your avatar to the main Council trading floor (the executive desk labeled `The Chairman`).
2. **Open the Direct Dialog**:
   - Walk up to him and press **`E`** (or left-click on him).
   - A direct messaging window appears with his portrait and the input prompt: `say something to The Chairman...`.
3. **Type Your Question**:
   - Type your question and press **`Enter`**.
   - He answers via speech bubble and in the dialog log in real time.

What to Type (Examples)

1. To Get the Complete 4-Pair Portfolio Scan

Type:

"what to do" or **"pairs summary"**

The Chairman answers with a synthesized institutional ballot:

text
[M15 Council Verdict]
• EURUSD: SELL @ 1.1166 (RSI14: 66.7, 7/10 Analysts SELL)

• GBPUSD: SELL @ 1.3389 (RSI14: 55.1, 7/10 Analysts SELL)
• USDJPY: BUY @ 157.52 (RSI14: 52.9, 8/10 Analysts BUY)
• GOLD: BUY @ 3898.90 (RSI14: 49.9, 8/10 Analysts BUY)
Risk Gates: Clear to deploy. Trade with half-size in high volatility.

2. To Focus on a Specific Instrument

Type:

"what should I do with gold?"

The Chairman responds with exact execution levels:

text
[GOLD M15]: BUY at 3898.90 | TP: 3912.55, SL: 3891.88 | Consensus: 8/10 Analysts BUY | Risk: 4/4 Risk Gates PASSED.

Or ask for any single pair or combination:

- `"verdict on EURUSD"`
- `"status on GBPUSD and USDJPY"`
- `"should I enter gold now?"`

The 15-Minute Monitoring Workflow

1. At the close of each M15 candle (e.g., at :00, :15, :30, :45 of the hour), walk up to **The Chairman**.
2. Press **`E`**, type **`what to do`**, and press **`Enter`**.
3. He audits the newly closed M15 candle across all 4 instruments and gives you the exact Consensus Direction, Entry, Take Profit, and Stop Loss.
